Referral for further care (8H...) History/symptoms (1....) - History / symptoms - .She has Past h/o depression and possibly abused in past. She was under care of private psychologist in kings heath till April. She has lost her job and recently moved locally. Currently she is very low and has lots of financial problems. She lives alone. She has no pst h/o of suicidal attempts as per		

history. Unfortunately combination of depressive personality+past bad experiences with loss of job has made her very low and thoughts of suicide constantly in her mind She has not made any attempts i have spoken with duty worker lance he advised fax copy and some one from the team will speak and triage and decide ?crisis team(i doubt needed) or appt next week.If she has no contact and worsening advised casualty review 2/52 she will think about antidepressants

Telephone encounter (9N31.) - Attempted to call patient all morning no answer. Visit scheduled Home visit attempted Rang doorbell for 10 minutes no answer. Eventually contacted by telephone - was frightened to answer door as Mum has allegedly been trying to call ambulance 4 x in last few days to take her back to Hospital as concerned re risk of Overdose. Married sounds fairly lucid HTT have requested script of sertraline but Overdose on paracetamol last week and has informed me is still having occasional suicidal thoughts but trying not to act on them. Has been in Hallam street as inpatient before and does not wish to go back Feels that constant upheaval and moving from wards and different staff increases her anxiety levels. Experiencing ongoing stress Recent HO LT abdo pain now resolved but led to loss of job and now undergoing hearing re possible eviction from House HAS GOOD FAMILY SUPPORT however currently living alone. Agreed will remain and discuss script if necessary. Have attempted to contact Sarah Cherrington on 2 occasions but unsuccessful. Saw Appt with Judy Schmid at surgery remain but feels unable to get up to surgery Have informed Judy's team as she is off duty today and will try HTT again remain. Patient is not experiencing any withdrawal symptoms off SSRI and agreed will be prescribed on remain		
Telephone encounter (9N31.) - with Home treatment team spoken to Michael Rodney Fax sent from Sarah Cherrington re request for Sertraline have been informed patient took overdose of sertraline and paracetamol 4/7 ago. Medication was reported in fax to have been taken away by Police and patient was discharged from Hospital. Michael informs me no further contact has been made from HTT over weekend and was unclear when FU due but thinks may be tomorrow. In view of concerns re suicidal ideation visit scheduled to see patient today.

Discontinued Medication: sertraline tablets 50mg. Extra Information: Form/dosage Change		
Home visit (XaBQf) - Still low in self. Finding evening worse. Marie was being visited by Father at time. Is not sleeping in night Had been given some of Mum's temazepam 2 x 10mg tab (1 left in pack) no relief. Partly due to environment as noisy neighbors but also due to recurring worrying thoughts. Is facing possible eviction after falling into arrears after medical health problems and not keeping up with medical notes. Is adamant does not wish to go back into Hallam street as feels nothing that can be done there that is not being done at Home. Good support network of Friends. Minimal alcohol intake. Smoker.. Is trying to avoid contact with Mum at present as she feels her mum is obsessing about putting her into hospital but Dad is visiting regularly Due to see Judy Schmid today. Occasional suicidal thoughts Had been on sertraline 100mg for only 4 days before med was discontinued after overdose 6/7 ago. Took paracetamol x68 with alcohol and was discharged after blood tests. No jaundice or vomiting. Appears lucid and appropriate conversation do not feel can section or admit to hospital at present in light of this Has mental capacity. Advised to restart sertraline 100mg od as weekly script s Rv in 1 week

Patient reviewed (6A...) - Patient turned up at Health centre at 6am with no shoes in freezing snow. Doesn't feel medication is working and came for help. Worried not coping at Home and needed to get out of flat. She is adamant however that she does not want to go into hospital. When asked why she is not wearing shoes she said she had not needed to come to surgery. First time left House in weeks. Normally feels anxious. Still expressing suicidal thoughts. Duty psych worker Vinny who also assessed today and agreed re bringing forward psych rev and alteration of meds. Appt arranged next week. Both agree appears to be more of a personality disorder here. Advised not safe re sleeping tablets at moment. Offered re transport home but that will have to finance this or calling member of family but refused this and said will walk home without shoes in freezing snow. Urged against this in view of physical implications.

13 Aug 2010 10:09	Telephone: Dr Baljinder Sidhu Entered at: Oldbury Health Centre	Entered: 21 Sep 2011 00:00
Discontinued Medication: hydroxyzine tablets 25mg. Extra Information: No Longer Required Patient reviewed (6A...) - Patient attended to discuss her problems, she had OD of her anti-depressant last week. Is due to see mental health team. Following this she was prescribed hydroxyzine as not sleeping. these have not helped. She is hearing musci all the time and cannot sleep. Mental health team aware. Agreed script few days of BZ. Advised her to contact jean and ensure she is reviewed sooner. Advised she may well need to be on other		

medication for her mental health. Has not had any further suicidal thoughts. maintained eye contact, appropriate speech and facial expressions, not distressed, good rapport.

Telephone encounter (9N31.) - Called to say the hydroxyzine are not working for her. Advised there are not many options if tried zopiclone and hydroxyzine, advised we may need to look into her Sx for depression a bit further. She has appt next tuesday and will do this then.

Telephone encounter (9N31.) - Patients mother called to at approx 17:50 to say Marie has been admitted to hospital I advised Dr ACB had been out this pm and no answer at door despite several attempts at door. She was in process of informing crisis team of situation. Sandwell EAU. Says they need to know what medications she is on. Called EAU and spoke to nurse looking after patient who says they have blister pack of her meds and do not require further info. I confirmed with them what is in the blister pack coincides with our records for meds.

History: called patient. requested visit for period cramps.on day 2 of periods. severe cramping,no vomiting. main concern is not sleeping due to problems with neighbour past 3 days. no thoughts of self harm.thinking of calling cpn.

advised best to be seen in clinic..offered apntment today. tells me cannot get taxi/dad at rugby. no vomiting

Plan: encouraged to call cpn. can leave medications for period pains..tells me dad can collect..advised that best if dad can bring her also to be seen by oncall today..patient will speak with her dad.Advised script left at reception

Problem: Back pain without radiation NOS (16C6.) - Updated by PH on 12 Oct 2009.

History: C/o hurt her back over the wkend just gone, was carrying a toddler, and as lifted twisted to swing him up onto shoulders. Lower back pain lumbar area, no radiation, no neuro Sx's, she finds sitting worse but finds moving around is better. has hx of overactive bladder, on vesicare for this. However over wkend had few episodes of incontinence, 3 saturday and 2 yesterday, bent down to do something, other time for instance stretched up to get something from shelf has experienced incontinence.

Examination: (chaperone nurse Hannah Smith) power 5/5 LL's, sensation normal, O/E - reflexes normal (2A12.)right LL, O/E - reflexes diminished (2A15.)knee left reduced, ankles equivocal response bilat, SLR poor to assess due to pain limiting ability to perform this, O/E - rectal examination - NAD (25Q1.)normal anal tone and squeeze test, perianal sensation normal

Diagnosis: ?sciatica/disc related back pain

Plan: D/w Mr Pichierri (SpR) QEH neurosurgery, (oncall consultant Mr Petrick), he advised analgesia for now, urgent MRI not required at present though some of the reflex reduction may indicate nerve irritation he says, however if further bladder Sx's or red flags to go A&E. has review app't wit ACB in 3/7, to ensure still attends for re-assessment of back/legs also. I advised her of red flags; weakness, incontinence urine/faceal, loss sensation perianal, increasing numbness/pins/needles legs to go straight to A&E as advised. Mental health currently stable, no suicidal thoughts, agreed script co-codamol, has had in past.

Zapain 30mg/500mg tablets (Advanz Pharma) - 60 tablet - take 1 or 2 4 times/day

25 Jan 2016 09:11	Surgery: Dr Ziafat Hussain (General Medical Practitioner) Entered at: Oldbury Health Centre
-------------------	---

Problem: Depression NOS (XaB9J) - [X]Depression NOS - Updated by PH on 04 Feb 2011.

History: Is not coping, has been a difficult week

End of last week - did not get paid her tax credits, someone hacked into her e mail - tax credit money was sent somewhere else, had to change, all passwords, 3/7 someone tried to steal her motor bike while she was at home. Damage to Bike. Due to start new job - awaiting start date - unsure whether she has the job. has fear. Doing Temp work as support worker.

Woke up this feeling that 'cant cope anymore' Feels low and anxious. 'my mood has spiraled in the last week.

No suicidal thoughts (XaIJ7).

She is keen to restart Mirtazipine that helped in the past

Examination: Tearful, anxious, upset

Plan: We agreed to re start ABove med that has helped in the past. WOuld like F/u with ACB - Booked 3rd Feb 0950

Immediate review if feeling more unwell/suicidal thoughts

Mirtazapine 15mg tablets - 28 tablet - use as directed

History: patient very forgetful, long standing mental health issues. but in a good place at the moment. Would like to come off mirtazepine, advised that we usually suggest that people stay on it for 6 months when well, but patient feels it really upsets her sleep and her sleep is very important to her. Advised that she can reduce it if she feels that its causing issues, but to just touch base with Dr Beveridge and discuss it as she knows the patient better than i do routine blds for memory issues requested

27 Jul 2016 10:21	Surgery: Dr Deborah Endersby (General Medical Practitioner) Entered at: Oldbury Health Centre History: T/C to patient. Requested home visit. She suffers with anxiety, worsened at the moment because she has a neighbour who is threatening to attack her and she was supposed to go to a tribunal with the council this afternoon. She has contacted the courts and said she is not well enough to attend the tribunal today. Offered appointment today - she says she cannot come as she is afraid of her neighbour. She is running out of zopiclone and diazepam and cannot do without them at present.	

Plan: It appears her need at present is for a supply of meds. She has not had either for some time. Will issue electronically and tesco to deliver. She is happy with this today and will aim to attend the appointment on Friday to discuss things further.

Diazepam 2mg tablets - 14 tablet - take one twice daily when needed

NHS 111 Pathways Report to Oldbury Health Centre (M88018)

27 Oct 2016 10:59	Surgery: Dr Baljinder Sidhu (General Medical Practitioner) Entered at: Oldbury Health Centre
-------------------	--

Problem: Telephone encounter (9N31.)

History: c/o vomiting symptoms since earlier hrs of this night, nausea first, can take sips fluids, but if takes more then vomits. no blood/haematemesis, no abdo pains, no diarrhoea. No recent alcohol use. usually on lansoprazole for reflux. under stress as new job 3wks ago, she feels this has not helped. feels ok in self otherwise. she had called NHS 111 for advice and was advised fluids/hydration and speak to GP if required.

Plan: we agreed script try buccastem, ensure regular sips fluids and keeps self hydrated. if not tolerating fluids, worse/abdo pains or haematemesis etc... to call back or for prompt review. she agrees with this

Buccastem M 3mg tablets (Alliance Pharmaceuticals Ltd) - 8 tablet - 1-2 tablets max bd, tablet to be placed high up between upper lip and gum and left to dissolve

Had call from Crisis team today regarding patient. Patient has called them to refer herself onto their books. She will need to be referred via GP. He wasnt sure on her symptoms i have tried to contact patient to get symptoms so referral to SPOR can get done however her mobile number is engaged and her home number is coming up as unknown.		
12 Dec 2016 16:01	Surgery: Dr Deborah Endersby (General Medical Practitioner) Entered at: Oldbury Health Centre	
Discussed patient with Sarah who has spoken to her today. Not having current thoughts of self harm/suicide, agree to give appointment on Weds with me for review and will refer to Crisis team/SPOR at that point if appropriate.

17 Feb 2017 09:14	Surgery: Dr Baljinder Sidhu (General Medical Practitioner) Entered at: Oldbury Health Centre
-------------------	--

Problem: Behav synd assoc with physiological disturb and phys factor (X00Sw) - Behaviour disorder - Updated by PH on 12 Oct 2009.

History: Patient reviewed (6A...) Stressed, had a tribunal for benefits claim. She is in work but off at present, but management not supportive now she says and may lose her job. She is struggling due to her stress and mental health so she had been using annual leave at times to cope and get through job. Has support worker Michelle from Peaches, who she is employing privately and has been funding by selling some of her items she says. She has tried before for trying to get support of similar nature but not qualified. Struggling with finances and at times can miss meals. Hx of BPD. Due to struggling, she is starting to get more morbid fleeting thoughts more, would not act on these at present and no preparations. Hx of OD's in past. Protective factors are the dangers she realised dangers from previous attempts and how much she upset family. She has a goal to get her own flat one day. Works for CAB. Sleep poor, has app't in a sleep clinic soon. She feels she needs the support of CMHT for further support. No current self harm.

Examination: well kempt, good rapport, tearful, normal speech/behaviour

Plan: refer PLS as she is at risk of deteriorating and due to previous risk factors. she is due f/u app't with Dr ACB. in meantime has number for crisis team and informed can attend A&E also if requires urgent input.

Summary Care Record Update

28 Feb 2018 11:34	Surgery: Dr Deborah Endersby (General Medical Practitioner) Entered at: Oldbury Health Centre
-------------------	---

History: With mum.

1) Issues with SPOR. She is open to North Team but they said she is not in their area.

2) Eczema on feet, cracked skin. Not using moisturiser very regularly.

3) Asks for 4 weeks supply of meds as she is struggling to get to pharmacy to collect and they don't deliver. Mum agrees with this plan. She has no thoughts of OD, no thoughts of suicide. Has been on weekly packs for 5 years.

4) Sleeping tablets, needs some more promethazine. I advised to take prn not every day, not to add to packs at present but can request when needed.

Plan: 4 week medipack supply sent by ETP to Tesco.

Try fucidin H for the lips.

eMED3 (2010) new statement issued, not fit for work (XaX1E)

(R) Circadin 2mg modified-release tablets (Flynn Pharma Ltd) - 56 tablet - TWO AT NIGHT

Fucidin H cream (LEO Pharma) - 30 gram - apply twice daily

noted recently changed to 2 weekly script and on meditrax and been regularly issued ? as ETP, ? as paper script, bit unclear, there is nothing on the system to confirm if pt collected it or not. See entry on 08/06, Dr Beveridge been trying to contact pt to sort out the chemist and home delivery, Have left msg for Dr Beveridge for t'row

Telephone encounter (9N31.) - Anita - pharmacist from Boots great bridge

Provision of telephone (XaDz8) - 01215576673

Actions (XaUI) - adv not to dispense, explained due to confidentiality i can't give details of pt's current medication details. If any queries pt contact the surgery directly, will leave msg for DR Beveridge reg the prescription

Discussion about treatment (Ua04r) - received prescription dated 15/01 and 18/05 and pt requesting these medications to be dispensed, the prescription initially went to pharmacy to u, an online one, pt wasn't happy and complained and then sent to boots, boots don't normally deal with the prescription and wants to know they need to dispense and if they don't if pt has adequate medication for now

12 Jun 2018 15:30	Surgery: Mrs Wendy Hill (Officer) Entered at: Oldbury Health Centre
boots chemist called regarding Marie script from the 18/5/18 it had just arrived there today 12/6/18 but there is confusion regarding later scripts need to speak to AC

29 Aug 2018 16:19	Surgery: Dr Deborah Endersby (General Medical Practitioner) Entered at: Oldbury Health Centre	
-------------------	---	--

History: Diarrhoea and vomiting. Started Thursday evening. She thinks because she had 2 day old kebab thursday lunchtime. Things settled after Sunday morning but then she had sausage and mash Sunday evening. Then yesterday she had diarrhoea. She had liver and mash ready meal last night, then this morning had both diarrhoea and vomiting.

Abdo cramps like bad period pains. feeling cold and sweaty. Temp has been low, temp was 32.6C at the lowest, mostly it is around 34. Is managing to drink water. This afternoon it is staying down. She has not felt nauseous this afternoon.

No blood in stool

Examination: temp 37.2, 132 / 79mmHg pulse 84, abdo soft some tenderness in LIF, bs normal.

Diagnosis: Food poisoning (X30Bd)most likely

Plan: Continue water, dioralyte/lucozade which she has been taking.

Let us know if unable to keep down fluids/blood in stool/severe abdo pains.

Call after weekend if still symptomatic - should have stool test results by then.

30 Aug 2018 11:24	Neptune Health Park: Mrs Eleanor Stone (Physiotherapist)	
-------------------	--	--

Presenting complaint (Xalm8)

2 weeks ago was assaulted by neighbour.

Shoved by neighbour and twisted. Felt a sharp pain in (R) lateral hip. Shoved again.

Pain worse standing/walking. - some days better than others.

Pain across top of thigh from lateral hip inferior to hip joint.

No pins and needles /numbness.

No lx.
No CES symptoms
No back pain.
No pins and needles.
New appointment (Ua2Ca)
Symptom aggravating factors (1D8..)
Standing
walking
Stairs.
Social and personal history (13...)
Lives alone. ? Has support worker.
Enjoys power Kiting
Has climbing wall at home along hall
Does yoga
Normally active
Symptom relieving factors (1D9..)
Sitting still
Watching movie.- Not aware of pain and forgets hip hurting.
Co-dydramol- Tries to avoid
Unable to take NSAIDS- reflux so avoids.
Uses topical rubs.
rests.
Home exercise programme (Ub1HP)
Abdominal breathing/relaxation.
Equal WB standing
Side stepping
Step alternate feet on/off step
Walking with relaxation through (R) leg
Sit- stand- equal WB.

Hip pain (X75rv)
Imp/ (R) antero lateral proximal thigh pain post assault. Non- specific in presentation.
Marked muscular guarding/ fear avoidance, breath holding. Not helped with H/O anxiety.

Plan/ advice, reassurance, relaxation with function..
Advice (X71Ez)
Discussed clinical findings and reassured,
Discussed healing and exercise.
Discussed pain not always equalling harm.
Informed consent given (XaLQR)
Follow up (Xaljm) - R/V and progress function as tolerated
Hip joint - range of movement (Xa79Y)
Functional
Demonstrated able to sit in cross legged yoga position and be relatively comfortable-
Marked muscle guarding and breath holding when attempt to move leg- pain eases with relaxation and breathing

Myotomes intact LL

General observation of gait (X76oq)
Marked antalgic gait- walk with stiff (R) leg.
Avoiding WB (R) leg
Observation of lower limb (Xa79F)
Sitting- (R) leg extended- More comfortable than when flexed.
Able to sit on elevated bed and swing leg into flexion when relaxed
Sit- stand- favours (L) leg
Standing- Favours (L) leg
No (Y0428)

No (Y0428)

No (Y0428)

Drug history (Y4609)

Lansoprasole, sertraline- but due to change

Ventolin, Sertraline, Circadin, Solifenacin,

Past medical history (14...)

Insomnia/anxiety- Under psychiatrist

reflux

Mild asthma.

Patients expectations of care (Y4917) - Frustrated re lack of activity and pain.

Informed consent given (XaLQR)

No (Y0428)

No (Y0428)

-------------------	---

Problem: Asthma (H33..) - Updated by PH on 12 Oct 2009.

History: TC, ID checked - Cough (XE0qn), Wheezing (XE0qs), inhalers less effective, also requesting rpt medication

Examination: Cough ++

Plan: appt booked at 1610 today, she will come with her mum

16 Oct 2018 16:18	Surgery: Dr Nandhini Ravindranath (General Medical Practitioner) Entered at: Oldbury Health Centre
-------------------	--

Problem: Depression NOS (XaB9J) - [X]Depression NOS - Updated by PH on 04 Feb 2011.

History: seen with mum, felt low y'day, so called her cpn and assessed by support worker and organised appt, feels much calmer now, no ideas of self harm, distracting herself by playing games on the phone and finds it helpful, medication changed recently and on venlafaxine, 5/7 of cough, mostly dry cough, using more frequent ventolin inhaler, smoker, no sore throat

Examination: well, no ideas of self harm, temp- 37, chest- clear, no added sounds

Diagnosis: Patient reviewed (6A...)

Plan: adv promethazine once a day as per the psychiatrist and can have upto 1 bd if need be, mum going to stay with her tonight, crisis team is going to assess her t'row, cough ? viral, continue clenil and prn ventolin inhaler,

review if no better or worsening symptoms

Promethazine hydrochloride 25mg tablets - 14 tablet - Take one at night when needed

Actions (Xa1UI) - adv to take 1 tablet of diazepam 2 mgms, spoke to crisis team, John, DSW, pt has already contacted this morning and crisis team is going to speak to her again today, called pt back, await call from crisis team, if still feels v low or ideas of self harm to call 999, pt understands and will wait for the call from crisis team
Discussion about treatment (Ua04r) - noted pt has cancelled appt, so rang back, hx of anxiety and depression, she called crisis team y'day as felt suicidal. she was assessed and offered to admit to p3 as respite. had panic attacks so couldn't leave the house, so stayed in the house, still feels life not worth living, feels like jumping into canal, lives alone, was prev prescribed diazepam for anxiety, still has 3 tablets

01 Feb 2019 13:38	Surgery: Dr Alison Beveridge (General Medical Practitioner) Entered at: Oldbury Health Centre	
-------------------	---	--

Problem: Telephone encounter (9N31.)

History: TC with Dr Rashid from Crisis team He visited P3 yesterday and today but Marie was unavailable. Will revisit on 4/2 Crisis team will prescribe til further notice

04 Feb 2019 13:51	Neptune Health Park: Mrs Rebecca Bancroft (Physiotherapist)
-------------------	---

Subjective (X78xk)

Patient reports she is in restbite at present due to mental health and has been struggling with her mental health which is why she has not been for so long along with her benefits being cut so she could not afford a taxi. This is not solved so she stated she should not have to cancel more appointments.

She reports pain is improving, still not reciprocal on stairs but is making an effort to step up at least one step with L leg first. Finds the stairs at restbite difficult as they are deeper than at home. Compliant with HEP provided 2x daily. Mainly twisting movement causes 'electric shock' type pain in L hip.

Follow up (Xaljm)

Informed consent given (XaLQR)

Objective (X80tg)

Full AROM bilateral hip flexion, abduction, MR, LR.

Pain ++ EOR MR.

Lx AROM flexion to ankles, SF to knees, extension full pain + EOR extension. Slump test +ve L leg ankle DF/PF. 4/5 strength hip abduction and adduction. 5/5 strength hip flexion, knee flexion and extension.

Home exercise programme (Ub1HP)

See sheet attached.

Sitting ankle DF/PF.

Clams.

Side lying abduction.

Bridge.

Thoracic rotation with abductor stretch.

Follow up (Xaljm)

Analysis (XM0lx)

Managing well with hip pain, Pain on twisting.

?LBP involvement.

Plan (XaIVg)

R/v 3/52 with ES

Patient to be seen by ES struggles to see new physios.

Patient record requested by solicitor (XaJ6E) - hm courts

28 Feb 2019 10:00	Neptune Health Park: Mrs Eleanor Stone (Physiotherapist)	
-------------------	--	--

Subjective (X78xk)

R/V. Pt reports much improved. Had sharp pain (L) lateral hip- worse when coughed. Now more settled.

Struggles with bridging exercise due to pain but now much easier.

Limited activity as fear of leaving flat due to anxiety from assault.

Hoping to move flat/apartmen as when at families no concern going out. Thsi has had an impact on pts overall fucntio /exercise tolerance.

Follow up (Xaljm)

Informed consent given (XaLQR)

Objective (X80tg)

Lx ROM- Ext/LEF- Mild discomfort posterior lateral hip

Combined ext/RSF- Slight increase pai butnot severe.

Hip ROM- Functioanl- Mild pai LR initially then on rpt no pain.

Struggles with hip extension and EIL- Posteiror lateral hip pain.

Community clinic note (XalkM)

Appointment (Ua26B)

Home exercise programme (Ub1HP)

EIL

Single leg kick prone.

Analysis (XM0Ix)

Fnctioanl returning to normal activities

Joining a gym and keen to return to netball.

Residual loss of hip extension- ? related to months og guarding hip and holding in flexion.

Pt feels confident to continue self exercise and self manage.

Plan (XaIVg) - Open.- Pt to contact if any concerns.

History: TC with patient . Says wanted to discuss medications . she saw Dr ACB few weeks ago . she stoppd venisr few weeks ago and discussed this with DR ACB . she was advised to continue circadin one at night . she is feeling very well and mood remained stable . I advised to continue with plan . Mood stable off vensir , take circadin at night . monitor and report if there is any changes or concerns .

MRI HIP LT: Clinical History :

Persistent pain L hip 12/12. No response to analgesia and physio

ENTERED BY: Beveridge

BLEEP: NOT KNOWN

MRI Hip Lt :

Technique: Routine sequences.

Findings: Articular cartilage over the femoral head and in the acetabulum is intact. No subchondral bone marrow oedema or cystic change. Normal femoral head-neck offset. The acetabular labrum appears intact. No hip joint effusion.

Normal greater trochanter and gluteus tendons.

The pubic rami are intact.

No soft tissue abnormality.

Incidental note is made of diverticulosis of the sigmoid colon.

Conclusion: Normal scan. Normal hip joint. No osteoarthritis. No trochanteric bursitis.

Telephone encounter (9N31.) - Silvia Mental health.

Discussion about treatment (Ua04r) - Marie has issues with Khaira charging for delivery so she changed. New pharmacy in west brom had her meds but also charging for delivery. So then she swapped to Duggals chemist and ordered meds again. After discussion with mental health she now has her meds and doesnt need ones issued 7.10.19. These have now been cancelled.

Problem: Home visit (XaBQf)

History: Visited at home as did not stay in A n E on 24/10 as informs me she had panic attack and couldnt wait any longer. Reported missing by ?BCMHT to the police who broke into her flat. Eventually located at home but had taken

OD IBF and PCM ? amount ? 2 packets of each. Did not reattend A n E for this but now under c/o Crisis team who are visiting this afternoon to supervise meds. Still pain in localised spot below L buttock no paraesthesia in leg or LBP but 2/12 noted what sounds like saddle anaesthesia and hesitancy. in last week aware of urge to defaecate but feeling of incomplete evacuation

Diagnosis: ? Cauda equina syndrome (F246.)

Plan: Advised needs urgent reattendance at A n E Does not wish family to know in spite of my request. Agreed to inform her close friend Vi. Advised prob slipped disc affecting bladder nerves and MUST stay in to be assessed. Pt in full agreement and emotionally much improved today. Ambulance arranged and message left for Crisis team, informed A n E

Actions (XaIUI) - i have asked her to keep me informed of any new developments.

Discussion about treatment (Ua04r)

I was told she was seen but cauda equina at the QE was not mentioned.

She will have an appointment to go back for an injection

she was prescribed Pregabalin but the pain is still the same. the medication is kept by the team.

I explained it will take time to have an effect and the dose

Telephone encounter (9N31.) - I have rung the patient and asked how she was feeling and what the outcome was following her appointment with the neurosurgeon.

Short message service text message sent to patient (XaMil) - It's #selfcareweek Antibiotics don't help with viruses such as sore throats, coughs or colds. The pharmacist can help with advice on symptom relief. Remember community pharmacies deliver accessible health care in the community so people can take care of their health and #selfcareforlife Think #selfcareforlife during #selfcareweek and always.

Problem: Behavrr synd assoc with physiological disturb and phys factor (X00Sw) - Behaviour disorder - Updated by PH on 12 Oct 2009.

Problem: Lumbar nerve root injury - L5 (SJ324)

History: Review of medication. She was not given carbamazepine by the pharmacy but was given all her other meds. She therefore requests further carbamazepine.

Also asks about dose increase. She was restarted back on carbamazepine as a mood stabiliser by crisis team after being off for about 1 month. Previously she had been stable on this since about easter.

She found the nerve root injection helpful.

She is not sleeping well - waking early in the mornings.

Plan: She will speak with pharmacist about the carbamazepine as we have issued this with the other meds.

Start pregabalin as per neuro letter. She thinks the dose is 100mg bd which sounds reasonable. She will let us know if it is a different dose.

Pregabalin 100mg capsules - 14 capsule - take one twice daily

Pregabalin 100mg capsules - 14 capsule - take one twice daily

Knee joint - range of movement (Xa7B6)

Right - flex/ext - 5/5

left - flex/ext 3/5 - unable to go against resistance due to pain

Hand functions (Xa2hY) - full AROM and power

Observation of movement (Xa6tr) - full AROM

Sitting position (XM0M0) - able to sit independently - some pain, using upper limbs to reduce pressure through back

Community clinic note (XalkM)

Rx - neural sliding - upright sitting - knee flex/ext, progression to add in ankle DF/PF - aiming for 5 minutes and aiming to increasing daily without going into pain

- Sitting down in line with chair - squatting practice, controlling descent

- prompted to increase right knee flexion on descent of stairs and left hip flexion on ascent.

Pain limiting mobility and impacting on ADLs.

P) Ring and book appt with locality PT in 1-2/52

Gait normal (Xa6tQ)

altered kinematics to reduce pain - little weight bearing through left leg, only toes in contact with the floor, quick stepping with right leg, little/no swing with the left, no heel contact, no toe off, hip hitching left side to reduce left hip flexion.

Attempted to complete a normal gait pattern - unable to maintain balance, pain++ in left leg, right leg giving way.

Functional (X907d) - Stairs - over using right plantarflexors to reduce flexing left hip on ascent, slipping right foot off the step to reduce right knee flexion on descent.

Able to stand from sitting (Xa2FA) - altered kinematics - increased weight bearing through right side - reluctant to weight bear through left due to pain

Standing up (X7A2i) - weight bearing through right side, flexed in the trunk and hips

Elbow joint - range of movement (Xa73a) - full AROM and power

No (Y0428)

No (Y0428)

No (Y0428)

Yes (Y0427)

No (Y0428)

Yes (Y0427)

Observation of movement of neck (Xa6vo) - full AROM and power

Movement of shoulder (X76n0) - full AROM and power

Pain (Xa07F) - sharp shooting pain down her left leg, burning pain in her back - inconsistent - worse on certain movements - flexing, walking, sitting for too long
No (Y0428)

Falls (16D..) - right leg gave way in the kitchen - carer present and assisted pt up.

12 Dec 2019 16:23	Home of Patient: Joasia O'Hagan (Physiotherapist) Entered at: Sandwell Community - Integrated Care Service
-------------------	--

Telephoned report (Xa1iV) - 16.30

Telephoned report (Xa1iV)

Telephone call to a patient (XalgC)

Telephoned report (Xa1iV) - Advised pt to be referred to the spinal service via her GP, as she has had physio for this back pain in the past. Explained that would be more suitable for her needs at the present time as the difficulties with her walking arise from her back pain. Unable to rehab mobility without improving her back pain first.

Actions (Xa1UI)

Pt to ring iCares and rerefer if back pain more manageable and wanting more community access work and gait re-ed.

If no contact in 1/12 - discharge off caseload

02 Jan 2020 17:10	Surgery: Dr Deborah Endersby (General Medical Practitioner) Entered at: Oldbury Health Centre
-------------------	---

History: Needs increase in pain killers. Left lower back pain - burning sensation. Radiation to legs.

Back pain (XM1GI)

She has been advised to get a referral for "spinal injury" clinic at Sandwell for physio.

Plan: Increase pregabalin to 200mg bd (advised to take 100mg mane, 200mg nocte for few days to titrate up gradually)

Referral to community musculoskeletal service (XaZRb)

I will check with secretaries which referral route is the one she needs and make referral.

STarT (Subgroups for Targeted Treatment) Back Screening Tool (XaX6F) 7 -

1. My back pain has spread down my leg(s) at some time in the last 2 weeks: Yes (1)

2. I have had pain in the shoulder or neck at some time in the last 2 weeks: No (0)
3. I have only walked short distances because of my back pain: Yes (1)
4. In the last 2 weeks, I have dressed more slowly than usual because of back pain: Yes (1)
5. It's not really safe for a person with a condition like mine to be physically active: Yes (1)
6. Worrying thoughts have been going through my mind a lot of the time: No (0)
7. I feel that my back pain is terrible and it's never going to get any better: Yes (1)
8. In general I have not enjoyed all the things I used to enjoy: Yes (1)
9. Overall, how bothersome has your back pain been in the last 2 weeks?: Very much (1)

STarT Back Screening Tool high risk (Xac47)

Symptom Assessment Scale - pain score (XabDu) 4

Weight decreased (X90kN)

Underweight (X76C3)

Body mass index - observation (22K..) 28.91 Kg/m²

Numbers (X80v6)

Community clinic note (XalkM)

Previous weight loss pt. gone from size 22- size 14 in clothing. (- 20lbs)

Now slowed down. Pt. happy with weight loss.

Community clinic note (XalkM)

O/E - weight (22A..) 81.2 Kg (~ 12 st 11 lb)

Initial patient assessment (XalBH)

Outpatient (Ua0WZ)

Informed consent given (XaLQR)

Non-smoker (Ub0oq)

Reason for referral (XalpS) - Weight loss, low albumin, poor daily diet.

Past medical history (14...)

Cauda Equina syndrome, anxiety, bipolar disorder.

Lumbar disc bulges, back pain, sciatica weakness.

Lunch time (XaB0I)

Gusto meal

e.g. Roasted sweet pot, onion, goats cheese, salad.

Breakfast time (XaB0H)

Eggs on toast, granary seeded bread or Porridge oats with almond milk.

Omlette/ frittata with veg.

Coffee 2- 3 brown sugars.

Social and personal history (13...) - Lives alone. Carers attend daily.

Community clinic note (XalkM)

This lady lost weight after suffering an injury and being in too much pain to stand and cook. She relied on take aways until carers were put in place to help with cooking. She was a lot in a lot of pain which resulted in her having frequent episodes of vomiting. There were times when Marie would miss a whole day's meals.

At present Marie orders from Gusto which she gets 10/11 meals from the ingredients per week. She tops up her shopping with Ocado deliveries of organic vegan meals.

She no longer misses meals and is currently changing to a plant based diet.

She intends to take a Multivitamin supplement as she is aware that she is at risk of B12 deficiency. She has previously been Vit D deficient.

I have no concerns with her diet at present. She is eating regular healthy meals and has a basic knowledge of nutrition.

Aim: To promote weight maintenance with a healthy diet.

Plan:

1. Continue to eat regular healthy meals.
2. Check Vit D, Vit B12 and iron status requesting blood test from GP.
3. marie to monitor weight.

Any further concerns regarding weight loss GP to re refer.

I will review on request.

Summary Care Record Update

21 Jan 2020 09:29	Home of Patient: Joasia O'Hagan (Physiotherapist) Entered at: Sandwell Community - Integrated Care Service
-------------------	--

Telephoned report (Xa1iV) - 09.40

Telephoned report (Xa1iV)

Telephone call to a patient (Xalgc)

Telephoned report (Xa1iV) - Returning phone call - pt reported having difficulties at home - in particular getting in/out the bath, causing a lot of pain and discomfort. Has had 1 shower in the past month with assistance from her mum, carers come to help wash her but unable to get legs over the bath. Reported also been having difficulties getting off the toilet. Reported has been to her GP and been referred to MSK and completed the back screening referral tool. The GP has increased the pregabalin which has allowed her to increase her AROM within pain free limits. Has been having to use a mobility scooter when been going out, explained I can order a 4 wheeled walker to assist with outdoor mobility. As I won't be in again until 11th Feb I will refer to an AP to assess outdoor mobility with 4WW.

Actions (Xa1UI)

Refer to AP - assess outdoor mob with 4WW.

Referral completed to OT for bath equipment assessment.

Ring on return to work.

History: Pain remains very difficult. Pregabalin increase has not helped at all.
 Ibuprofen triggers reflux and asthma and did not help much with pain. Paracetamol does not help.
 Not able to do the physio exercises as fully as she would like but is doing them every hour.
 Numb area left medial midfoot area. 1-2 weeks history. Could stick a drawing pin in the area and not feel it.
 Dragging left foot in trainers but not so bad in her walking boots, therefore is wearing walking boots all the time now.
 Examination: Focal area of absent sensation left medial midfoot. Otherwise sensation present in left foot and lower leg. Drags left foot and right foot turns inwards when walking.
 Walks with wheeled frame.
 Plan: Try cocodamol. Reduce pregabalin back to 100mg bd with possible decrease further down to stop.
 Review phone appointment next week.
 History: Left eye feeling gritty. Seen optician around xmas and felt the same then. Optician did not find any abnormality.
 Examination: Left eye: mild conjunctival injection. Slight puffiness/redness under the eye and watering.
 Diagnosis: Conjunctivitis (X00Zh)
 Plan: Treat for conjunctivitis, review if not improving.
 Chloramphenicol 0.5% eye drops - 10 ml - one drop 4 times/day
 (R) Co-codamol 30mg/500mg tablets - 30 tablet - take 1 or 2 4 times/day when needed

Present on visit OT and pt.

Pt reported her main concerns are indoor and outdoor mobility, stairs in and out of the building up to her 1st floor flat, transfers on/off WC and in/out of bath.

She confirmed she is due for back surgery 26/02/2020 at QEHB.

She stated she uses the online system for rehousing but no suitable properties have been available

Pt demonstrated independent mobility around her flat using x2 EC but reported pain +

Transfers in/out of bath to access OB shower. She used the bath board and assistance x1 to lift left leg over the bath.

Pain ++

OT fitted FSTF around WC - pt reported transfers easier with FSTF than x2 grab rails but still experienced pain ++

PLAN; OT to order 4" RTS to be delivered and fitted.

No further OT identified by OT or pt.

SCHS Rehab OT performed (2 out of 28)

-------------------	--	----------------------------

Subjective (X78xk)

Reported had a fall last Wednesday, experienced severe pain and fell in the kitchen. Was unable to move, eventually crawled to the living room and was able to ring for help but no one had access to the flat. eventually a friend with the key was available and pt had managed to get herself up onto her chair at that point. 999 had also been called and checked pt over - did not go to A+E. Had an appt with orthopaedic consultant also for lumbar discectomy. Surgery scheduled for Wednesday 26/02/20.

Has borrowed some elbow crutches from a friend who works at a care home as pain has increased but they have to go back on thursday. Discussed a keysafe - pt happy for one to be fitted at the back door, has cameras out the back

so more secure.

Informed consent given (XaLQR)

Objective (X80tg) - Mobilised around flat to open door. Requesting to review outdoor mobility using 4WW. Taught how to use the crutches correctly on the stairs. Observed mobilising outdoors with 4WW - handles raised.

Clinical management plan (XaJYd)

Order 2 x elbow crutches

Organise keysafe

Analysis (XM0Ix) - Await outcome post surgery to review gait.

History: T/C to patient.

She is going to have surgery: posterior decompression microdiscectomy next week.

She is concerned about the rehab after the operation, and what the recovery time is.

She was initially very stressed on hearing the operation would be so soon, however is coming to terms with it.

She was supposed to be starting DBT group the week after surgery but physio gave impression she would not make it for this. She has spoken with the CPN who will make alternative arrangements for counselling for her.

Asks for letter for police re her medical treatment as the initial symptoms started after she was assaulted by her neighbour.

Plan: Advised usually 6-12 weeks off work following spinal surgery. Would expect at least one night in hospital after surgery, likely 2-3 nights.

Advised her to email the surgery with letter request (she would not be able to make it to the surgery given her spinal symptoms), fee likely £30-40.

Summary Care Record Update

02 Mar 2020 12:08	Home of Patient: Joasia O'Hagan (Physiotherapist) Entered at: Sandwell Community - Integrated Care Service
-------------------	--

Telephoned report (Xa1iV) - 12.15

Telephoned report (Xa1iV)

Telephone call to a patient (Xalgc)

Telephoned report (Xa1iV) - Reported hasn't had her surgery yet, postponed for Wednesday 04/03/20. Reported crutches were delivered last week but too small, were taken away by the team and reported will order a larger set.

No set had been ordered. Therefore reordered for pt.

Actions (XalUI) - Ring equipment stores to see if they can do a quick delivery as not accepting collection of orders.

Telephone call to a patient (XalgC)

Telephoned report (Xa1iV) - 15.30

Actions (XaUI) - Review next week if appropriate

Telephoned report (Xa1iV)

Telephoned report (Xa1iV)

Reported surgery went well - reported no changes to sensation, power is improving, pain is improving. Fell a couple times since surgery - last week she blackout out for a few minutes, felt like she was having a seizure, did not ring her GP. But her back has been hurting her a lot more since. Bladder control has worsened since the surgery. No excessive sweating.

Advised pt to ring her GP to review BP - explaining current situation.

No signs of COVID-19

-------------------	--

No abnormality detected (Xa1vB)

24 Mar 2020 10:32	Surgery: Dr Etya Talzohrah (General Medical Practitioner) Entered at: Oldbury Health Centre
-------------------	---

History: telephone encounter at 10.33am as per call back request.

stated had spinal discectomy 3wks ago for sciatica type symptoms left leg.

stated 1/52 post surgery felt great, pain much better.

had a fall on Friday, leg got trapped inbetween furniture, was unable to get herself up. carer arrived and attempted to raise her with no success. paramedics were called, and helped her up. nil concerns noted, nil a&e presentation.

stated recalls events of fall, fell on route to living room from bedroom, stated everything began to go black slowly, fell flat on her back, raised her head up and saw her body and legs jerking.

nil reports of tongue biting/urinary incontinence at that time.

stated sharp spasms of pain into top of left thigh even at rest intermittantly since.

nil further visual disturbance, nil slurring to speech, nil weakness/change in sensation limbs. stated had bladder problems prior to surgery, cant get to toilet in time, aware of sensation to urinate. has accidents subsequently.

Plan: advised observe for now. continue current analgesia. stated did not receive pregabalin with rest of her meds recently. prescription forwarded accordingly.

advised gp callback if further episode of concern.

advised a&e sooner if slurring to speech, changes to power/sensation limbs, visual disturbance, blackout, LOC.

happy with plan.

(R) Pregabalin 100mg capsules - 14 capsule - take one twice daily

Subjective (X78xk) - Reported having a fall approx 10 days ago. Pt is feeling very fed up of falling, worried she is going to seriously hurt herself. She is unable to get herself up most of the time and has to wait for the paramedics. Reported her mobility and pain has worsened since this fall.		
Informed consent given (XaLQR)		
No abnormality detected (Xa1vB)		
Treatment (Ua22j)		
Knee extension in sitting (leaning back into chair to reduce neural tension) x 10 bilaterally		
In standing - equal weight bearing, assisted lateral sway, reaching out of base of support with alternate ULs.		
Marching on the spot in standing - holding onto 4WW.		
Clinical management plan (XaJYd) - Ring and review in 1/52. Advised to continue with exs with chair or perching stool behind her.		
Objective (X80tg)		
Mobilising with 4WW in the house.		
LL AROM - right hip flex, knee ext/flex and ankle DF/PF - full		
Left - reduced hip flex, approx -10 degrees knee ext, full ankle DF/PF.		
Pain on bilateral knee extension in left buttock.		
Analysis (XM0Ix) - Loss of balance throughout standing exs - pt appears to be putting little weight through left leg, loses balance on right and hops to compensate however further continues to lose balance - appears more habitual.		
Reporting some pain but more apprehension and fear of falling. Pt appears very low in mood. high risk of falls.

Telephoned report (Xa1iV) - 14.20 Telephoned report (Xa1iV) Telephoned report (Xa1iV) Reported having bought herself a secondhand wheelchair on Friday. Reported being pain free since then, feeling much happier. Has actually been able to do some exercises due to being in no pain. Experiencing some discomfort in her back but she can cope with this. Reported having a fall yesterday morning in the shower. Right leg gave way hit her left arm and head on the bath. Able to get herself up independently, carer present in the property at the time of the fall - reported no need to ring the paramedics. Prior to getting the wheelchair on Friday reported feeling suicidal. Reported Googling how to make a noose, noticed a number to ring if feeling suicidal, recognised she was in a crisis and rang her GP and mental health nurse. Also spoke to her sponser. Reported having bipolar disorder and this can happen quickly. Reported using her skills to assist her out of this crisis. Reported GP has increased her pregabalin. Completing exs with carers - marching on spot and swaying due to feeling unsure and scared of falling. Reported using upper limbs a lot to sport herself. Suggested to complete sit to stand exs instead - focusing on equal weight bearing with feet, using upper limbs to push of the wheelchair, maintain equal weight bearing and then sit down. Encouraged to maintain static standing with limited support from upper limbs, again equal weight bearing. Advised to be aware of any movements in the chair or lying she can make without increasing pain - eg straight leg raise in lying. Try to complete some movements throughout the day without increasing pain. Try to mobilise 2-3 times per day depending on pain levels. Potential to lose strength from mobilising less. Pt reported feeling in much better spirits. Does not require any further intervention regarding her mental health. Actions (XaIUl) - Review in 1/52 Telephone call to a patient (Xalgc)

Telephoned report (Xa1iV) - 10.20

Telephoned report (Xa1iV)

Reported has been without pregabalin for a few weeks now - reported difficulties getting prescription from GP - was offering tramadol, but pt knows this was not suitable. On Saturday night her carer was concerned she had overdosed - pt reported the box had incorrect labelling and tried to reassure carer that she hadn't overdosed. 999 called - went to Russells Hall - given fluids and blood tests came back negative.

Pt reported pain is worsening - feels worse than prior to surgery. Has had 3 falls in the past week, 2 episodes of no bladder control - emptying bladder fully (Normally just a little leak).

Feels her mental health is struggling and doesn't take much to trigger a crisis with her bipolar disorder.

Actions (Xa1UI) - Contact GP - inform of current situation and request a spine scan.

Telephoned report (Xa1iV) Reported having a discussion with friends in the medical profession - reported having had a few overdoses between 2010-2014 and having been in a coma for 6 days. Her medical friends reported she may have had toxic anoxia and so may benefit from a CT head. Reported feels having an understand of whats going on may help her deal with her BPD and executive functioning. Explained I feel that her management would not change if she was to have a head CT and diagnosis of brain damage. Explained she would mainly benefit from OT input for cognitive rehab however, this may not be urgent at present. Explained I have contacted the GP and awaiting a call back - have requested that he look at the notes on the system to organise a spine MRI. Her mental health nurse has reported she feels Marie has autism - Marie is adamant that she doesnt as she has a very good understanding of autism, and so has stopped her weekly CBT

phone calls with this nurse. Reports this will not be at a detriment to her mental health.

Using the wheelchair all week. Has been doing marching on the spot, lateral sway still causing pain, reaching within base of support without pain. Has had 1 fall on Saturday, in the evening going to the toilet.

Telephone encounter (9N31.) - Patient

Actions (Xa1UI)

stop pregabalin

commence amitriptyline

OT assessment re mobility at home

call back if no improvement or worsening symptoms

Discussion about treatment (Ua04r)

TC due to covid 19

recent recurrent falls

cauda equina syndrome

surgery in March

recovering well in first week

then had fall and had to call paramedics

has had recurrent falls since

mobilises with a wheelchair in the flat but uses rolator/crutches in the bedroom

feels leg spasms and then tries to put weight onto arms and rolator slips up and she face plants onto floor - where she is having most falls

happen frequently during the day but only a problem when mobilising

no lightheadedness, no palpitations, no chest pain prior to fall

no headache, no LOC or head injury

no relief from pregabalin

(R) Amitriptyline 10mg tablets - 28 tablet - once at night

Amitriptyline 10mg tablets - 28 tablet - once at night

30 Apr 2020 18:38 Tramadol 50mg capsules requested by the patient - Issued

01 May 2020 17:08	Surgery: Dr Stephen Dawson (General Medical Practitioner) Entered at: Oldbury Health Centre
-------------------	---

History: TC - ID checked.

Persistent back pain. Sometimes flares up.

Pregabalin 150mg bd, tramadol prn taking once or twice a day if needed.

Diazepam - takes for anxiety. takes 4-5 times a week.

Says back pain better on pregabalin.

Advised that as she has 3 weeks left of tramadol at current dose to continue on this,

Put co-dydramol on rpts - advised much better outcomes long term than tramadol, as using infrequently to use this instead of tramadol.

Advised she has enough diazepam currently - will call if requiring more. Currently using CBT more than medication to control anxiety.

Additional SCR dataset uploaded under COPI Regulations (Y237d)

Co-codamol 30mg/500mg tablets - 30 tablet - take 1 or 2 4 times/day

Ended 01 May 2020 Prescribing error by Dr Stephen Dawson

Co-dydramol 20mg/500mg tablets - 56 tablet - take 1 or 2 every 4-6 hrs

Ended 17 Aug 2020 At the Patient's request (vomiting) by Dr Saira A Khan

Summary Care Record Update - This patient's preference is for only core items to be included in their Summary Care Record. This has been overridden so that additional items will be included in this patient's Summary Care Record.

05 May 2020 09:30	Home of Patient, Joint Visit with patient: Patricia Edwards (Physiotherapist) Entered at: Sandwell Community - Integrated Care Service	Entered: 06 May 2020 09:51
-------------------	--	----------------------------

Objective (X80tg)

Sit to stand; able to achieve from wheelchair with maximal use of both hands onto four wheeled walker

Able to sit to stand from anti gravity chair; weight bearing through her upper arms and right leg, because of design of the chair she can not put her feet behind her knees.

Gait with frame; using upper body to take weight of both legs

Reduced stance time left leg and left swing phase; leg is externally rotated and planterflexed during swing phase.

Right lower limb; reduced weight bearing though right leg able to extend leg and clear with knee flexion and hip flexion during swing phase. Able to walk from lounge to bathroom and toilet in two separate trips. Not able to take frame/ wheelchair into bathroom or toilet

Access to the bathroom; uses rope ladder and crutch and then uses the radiator to move down the bathroom, sit on the bath board to do teeth or stands holding onto the basin.

Access to the toilet uses the hanging rail to support self and crutch. has toilet frame/ raised toilet seat and rail on right hand wall.

Discussed pain relief; feels is managing and using mindfulness.

Reported that she felt like she had enough and did not consent to further assessment.

Analysis (XM0Ix)

Decline in mobility since operation at the start of March 2020.

Now using wheelchair as main form of mobility in the last month.

Falls incidence has dropped using the wheelchair.

Pads not containing urine

Not drinking enough

Clinical management plan (XaJYd)

To refer to continence team

Stores to remove four wheeled walker.

To discuss decline in mobility with Orthopaedic Surgeon.

Subjective (X78xk)

Applied PPE

Let into the property by Marie in her wheelchair.

Introduced ourselves

Marie report that the main problem is

1. Falls in the bathroom/ toilet- Sandwell Assist are not going to put anymore rails in the bathroom/ toilet as she is on

the waiting list to move and have offered her a commode which she has refused.

2.Deteriorating mobility since back operation; reports that she has been told her condition is degenerative. Now using wheelchair to get around the flat along with frame. Mobility was very good after operation for about 1 week- was able to do x 6 steps before discharge and was using 4 wheeled walker. Told by wheelchairs she was not eligible for a wheelchair as she was using a frame to walk indoors.

No dizziness or blackout when falling, depending on how she falls she does can sometimes get herself up. Has Google assistant which she can call for help with.

The falls are caused by a sharp pain in her left leg and then she has to brace herself on the frame and when she was using the four wheeled walker she tipped backwards. Also reports that her right leg is giving way. Falling every day- now reports falling 3- 4 times a week. Has a new frame which she feels is more stable and has had this for a week. Big fall approx 10 days after she came home 12 March 2020 and could not get off the floor, was on the floor for approx one hour, fell by the sofa and was wedged on her left shoulder up against the sofa. It was after this incident that she started experiencing a greater loss of urine when incontinent, she has called the Orthopaedic Consultant and he was not concerned as she presented with incontinence pre- operatively. Pads not containing the urine. Discussed re- assessment by Continence Team gave verbal consent.

No new numbness or pins and needles. Reports new intermittent paraesthesia on the dorsum of both feet left more than right; feels like cold water dripping onto her feet, has had this for about 1 week.

Numbness in perineal area has improved in the central area. Can not feel herself passing urine or a bowel movement. Always gets an urge to pass a bowel movement in her tummy from childhood. Reports bowels normal for her. Not drinking to limit trips to the toilet- have at the most 750 mls of liquid. Discussed should be having at least 1 litre minimum but ideally 6-8 cups.

Weight loss- has lost a lot of weight due to not being able to cook for herself, now she has carers to x 1 three times a day.

Custom Care Agency to assist with meals weight loss has slowed down. Seen by Dietitian.

Swallow ok no problems

Eyesight - reports finding small print difficult to read, has had eyes tested this year.

Reports doing exercises x 4 a day, using frame to walk with for exercise; has added in a back support to help her move into extension.

Has recently purchased a anti- gravity chair- had to borrow money from her Dad, really feels this helps by re-distributing the weight and stress along her spine.

History of back pain; started approx 18 months ago when pushed by neighbour- constant burning pain in centre of low back and intermittent stabbing pain into left gluteal cleft and can radiate down into left leg on the lateral aspect and onto the dorsum of the left foot.

05 November 2020 seen and injection planned- undertaken on the 02 December 2020.

Admitted 4 March 2020 and discharged the 6 March 2020 for L4/L5 decompression surgery.

Other medical conditions;

Asthma

Borderline personality disorder- under the care of the Community Mental Health Team.

Gastric Reflux

Has good family support but no family are not near by.

Reports has a mental health nurse, but finding her condition hard to manage and this has an detrimental effect on her mental health.

Informed consent given (XaLQR)

Telephone call to a patient (XalgC)

Telephoned report (Xa1iV)

Call to Marie to inform her that I had spoken to the Neurosurgical Reg Wai Cheong re; her poor mobility and that they would ring her and update her with the clinical plan. Hopefully they will get her in to be seen in the near future.

Explained that if her weakness in her legs got suddenly worse or she experienced an deterioration in her bowel or bladder symptoms or new numbness or pins and needles to call 999 in the meantime.

Marie told me that because she had the operation she had been told that would not happen, I said I appreciated that but the decompression has only been happened at one level and the decline in her mobility had been gradual, I did not know what was happening with the rest of her spine and to call 999 if the above symptoms occur.

Marie did agree she would seek help urgently if needed.

Reported that she was given the number by Asia to call wheelchairs.

Telephoned report (Xa1iV)

Call to Wendy OT on B4 at RRH Hospital Maire was discharged last night, admitted through ED due to new bowel symptoms

Urgent MRI- showed L4/L5 disc extrusion

No cauda equina symptoms

To be managed conservatively

Has follow up apptn at the QE

Discussed that I had only seen Marie for the first time last week and had contacted the spinal reg on call re; her deterioration in mobility now using wheelchair and could do stairs with my colleague, however I did not feel that it would be safe to attempt to do the stairs with her. The plan originally was for a MRI Sat and clinic Mon 11.05.20. Discussed that Marie is unsafe to walk with walker- I had advised this before this admission on the visit when last seen.

Discussed that she can not acces the toilet and bathroom with wheelchair and she has refused a commode- refused on the ward also.

Marie has developed an intermittent foot drop in her left foot approx every 4th step.

Discussed this is new.

Ms strength on the bed 4+/5 left LL and right LL 5/5

Advised no to do forward flexion - ?has been doing sit ups?

To follow up tomorrow at home.

Telephoned report (Xa1iV)

Telephone call to a patient (Xalgc)

Telephoned report (Xa1iV)

Phone call to Marie, patient transport would not take her for the MRI or to the hot clinic as only taking oncology patients or radiology patients.

On the 9th May was incontinent of urine when sleeping and rung 11 for advice, ambulance sent and then admitted.

Had emergency MRI- central disc protrusion? but has had a discectomy.

Will not be able to attend hot clinic at the QE because she can not do the stairs and needs hospital transport.

Still has cattle prod feeling gluteal cleft left buttock and left calf pain radiating down into left foot, comes in intermittent waves then eases off.

Told not to walk by OT.

Lying in bed takes the pressure off and lying back in chair.

Has been told to self isolate

Was doing sit ups as part of normal routine, aware not to do now

Telephoned report (Xa1iV)

Call to Marie, apologised re; my mistake that she had been admitted. Was at the QE via ambulance on the 16.05.20 and discharged home, seen by PT who reviewed scans and talked to the Neurosurgical Consultant who advised conservative management and referral to the pain clinic at Russell's Hall. Has had some left ankle pain with insidious onset that was present when she went to A and E, muscle power was checked when she was in A and E but no one looked at her ankle. 8/10 pain at rest. No falls, swelling just above ankle when you push it it does not leave a mark the fluid moves to the other side, not red or hot to touch. Left calf not hard, hot, swollen or painful.

Advised to walk as much as possible but Physio did not assess walking, reports he was happy with her Muscle strength. Told not to use AFO issued by Russells Halls PT. No new sensory symptoms.

Seen in the Hot Clinic with Dr Inam who advised to wait and be reviewed, told to walk as much as possible. Feels very uncertain re; changes in medication, does not feel any better after attending A and E or clinic apptn.

Discussed only option if ankle remains painful to have an x-ray and to contact GP re this or to call 999 if it becomes swollen, red, hot in both her ankle and or her calf.

Advised not to walk with frame based on my last assessment with her.

Does not want commode, feels that she can manage the toilet.

Said I can see if I can talk to Dr Inam. To see on the third as planned.

History: query re:pregabalin

I had discussed this with Sallie few weeks ago

dose as per hospital of pregabalin is 150 mg TDS

I had d/w SALLie previous blister packs Sallie had said Bal was aware of this

correct is pregbalin 150 mg TDS as per entry SK and Sallie

I will also check with whotes this is what they have been giving

spoke to Bal chemist whites 18th may went doseette 150 mg TDS

but then last one was 150 mg BD 27th may BD

next tray going out 3rd june cant pull down early but can cancel and issue right script

they are aware re:correct dose 150 mg TDS

the future dated scrips due to drop 3rd june have cancelled pregabalin 150 mg BD and issuing TDS today for 3rd

june and repeat is now correct also moving forward

chemist aware for dosette

Subjective (X78xk)

Covid pre- screen no Covid symptoms.

PPE applied as per trust guidelines

Let into property by Marie using walking frame

GP trying to arrange respite due to poor mental health

Under the care of the Crisis Team since 30/05/20

Would like physiotherapy to help with non medicated pain control; feels like she is having do mindfulness a lot of the day.

Has been walking x 4 a day using frame and doing exercises.

Only able to tolerate 10 minutes of activity before needs to use recline chair or bed to rest.

Can now lye on front for 10 minutes in bed- new.

Informed consent given (XaLQR)

Clinical management plan (XaJYd)

To review with OCAS PT re; tens use

To review home exercise plan.

To call CPN Jen Mannix South Well being team.

Analysis (XM0Ix)

Discussed positives- now able to walk; gait looks more stable as able to put more weight through lower limbs.

Able to lie on tummy

Able to stand with upper limb support.

Objective (X80tg)

Walked from front door to lounge, gait with frame; left leg externally rotated during swing with reduced left hip and knee flexion, observed toe extension during swing. Stance left leg; left hip and knee flexed left foot planterflexed. transferred self from walking frame onto armchair.

Back pain in left buttock and top aspect of lateral left calf and by left ankle 3/10

No new urinary symptoms

No new numbness or pins and needles

Saddle numbness remains the same

No right leg pain

Increased frequency of bowel movements that started this morning; getting cramps in stomach and then coming out in a sweat has been 4-5 times this am, solid motions. Discussed has not had all medication since Monday- no pregabalin, ? withdrawal.

Looks agitated; discussed how she was feeling; self referred to crisis team at the weekend as was planning to overdose.

Has been thinking about killing self but has no current active plans, now medication has been removed by Crisis team.

Feeling overwhelmed with no change in pain or pain control since reviewed by RRRH and QE. Discussed that the main finding of this that there was nothing sinister going on and it was important to establish this.

Also feels overwhelmed by aggression from neighbours and next door; for example taking her wheelchair and using and abusive behaviour towards her. Has been offered ground floor adaptive property in Coventry but can not move

as does not have any money and can not be supported to do this with a loan as the property is not in Sandwell.
 Falls going to the toilet- x 2 since discharge from RRH last one on Saturday no dizziness or blackout, able to get up from the floor, not going in the bathroom. Not drinking more than 4 cups a day as does not want to go to the toilet. Discussed importance of drinking more, asked her to consider wheeled commode.
 Smoking 10-15 a day, once mental health has improved discussed that this was something if reduced would really improve health.
 Seated right knee extension 4/5 left 3+/5 Dorsiflexion 4/5 left right 5/5- (pulls into inversion) planter flexion left 4/5 right 5/5
 Eversion left 3/5 right 4/5 inversion left 4/5 right 4/5
 Knee flexion right 4/5 left 3+/5
 Hip flexion right 4/5 left 3+/5
 No increase in pain on seated left knee extension with dorsiflexion
 Standing able to stand from frame and put both feet on the floor, advised to do back extension exercise in sitting.
 Session discontinued as Marie needed to go to the toilet to move bowels
 Crisis team coming to visit later today

Telephoned report (Xa1iV) - 11.24

Telephoned report (Xa1iV)

Call from Elsa Matthews PT at Hallam Street re; Marie- has had x1 witnessed fall with four wheeled walker.

Discussed management to date; seen x2.

? Some functional element to her gait pattern

Very distressed by social situation with neighbours and I feel that her mobility is unlikely to change until her environment changes. Advised Elsa I had not checked her home program and this was next on our list to do.

P= to await feedback from Hallam Street.

History: COVID Outbreak TC ID checked - Discharged by Hallam Street yesterday with no medication, Medications due to be dispensed from CM Whites on 28th 2. Usually has carers tds for personal care, she is struggling to reinstate package- Agency saying capacity issues and will try to arrange an agency who can provide care for her needs Spoke to Mum who is worried and not happy with discharge arrangements from Hallam Street Plan: Task to Lorraine - Social Prescriber to help with care package. Spoke to Bal Pharmacist - Says he spoke to Hallam Street Dr who said 2 week meds have been supplied to Px on discharge. Spoke to PX and Mum again - They both say no medication on discharge with patient - I advised they liase with Hallam Street about the medication - ? whether they are waiting to be collected. Mum wants to make complaint against the hospital. I explained I am unable too refer Px back to Hallam Street as failed discharge as no acute PSyh problem. If mum is unable to obtain meds today and arrange carers, then will need to return to hospital - Mum feels the same - as Px not safe at home alone with no carers

-------------------	--	----------------------------

Informed consent given (XaLQR)

No abnormality detected (Xa1vB)

Analysis (XM0Ix)

Improved quality of gait; improved muscle power and range of active movement.

Still at high risk of falling.

Endurance improved.

Discussed wheelchair as private provision- WC will not retrospectively fund but may benefit from assessment. Has been advised to get a carbon fibre wheelchair from Charities that she has been involved with and crowd fund this.

Would like to be referred to wheelchairs.

Clinical management plan (XaJYd)

For Marie to increase sets of each exercise gradually x 3 sets.

To increase walking distance as able.

To call if any problems with perching stool transfers or toilet frame.

To call me when she wants to progress her exercises after she can achieve x 3 sets of 10 of each exercise with a minute in between; has record sheet from Hallam Street.

Advised her exercises should not give her any new pain or increase her existing pain. If feels unwell to call 999.

Marie requesting letters as has made a complaint to the HCPC about social services OT. Advised her that if she sent me the email from the HCPC I could ask what the correct procedure was. My email address has been given.

Referral to wheelchairs.

Subjective (X78xk)

Let into property by Marie; had phoned ahead and advised I would be approx 45 minutes late. Apologise for this.

A friend had just left.

Feels much better now she has not returned to flat

Sleeping better- was very tired last night

Drinking more fluid as can get to the toilet easily. Last drink with tea.

Care package still continuing.

Has bed leaver on bed and this has made getting into bed easier- supplied by Manfoldia Grange.

Able to shower.

Able to do washing up but can not access the hob- Mum going to pick up perching stool and toilet frame this week.

Managing toilet transfers rail on left hand side of toilet in between shower.

Did have fall when first transferred on the Friday night when transferring off the toilet fell forwards, lost balance when pulling up trousers/belt and woke up on the floor, tried to get self up but then called staff.

Was confused and dazed was admitted to the QE, had CT and MRI

Left planter absent- this was a concern- needed to be reviewed by Neurologist before discharged. Discussed that may be this was due to the neurological damage that was cause when she had her cauda enqina symptoms, but hard to be exactly sure about this as we do not have access to the QE's notes.

No change in sensory symptoms- still has some numbness in central perineal area, no new numbness or pins and needles.

Discussed that most of her disc that caused these symptoms has been removed, Marie is aware that this disc has protruded again and this is causing her symptoms of left leg pain, discussed that disc's are like donuts and it is the jelly in the middle that moves when we move.

It is unlikely that the disc that was mostly removed would now cause spinal compression but it is important to realise that this would be a emergency situation if she has a change in her bladder control or pins and needles or numbness in her saddle area- explained where this was.

Is going to have follow up from the QE re absent left planter.

Discussed that it is important to avoid any sustained positions and sit up's for this reason.

Can now sleep on her stomach and is finding this easier.

Now can walk 2-3 times a day for half and hour with walker. using the foot drop splint during the last walk of the day.

Doing exercises from PT at Hallam Street x 2 a day, was doing x3 times but found this was a bit much.

Contents of flat will be packed up.

Pain in low back to left hand side and slight warm feeling lateral aspect of left thigh. Still getting shooting pains this has not reduced in frequency

Able to tolerate sitting out for much longer, needing rest after lunch on bed.

Objective (X80tg)

Demonstrated able to bilaterally extend knees in chair, no increase in pain, but when extends right leg this increases left back pain.

Seated knee extension L=R full range

Seated DF L=R full range

Seated hip flexion L=R 140 degrees reports tight when flexes right leg.

Discussed toilet transfers; and Marie demonstrated the method but did not complete. Feels safer but feels the toilet frame will help.

Discussed that she is practicing standing in the shower- advised against this.

Checked seated upper limb exercises with arm weights in wheelchair

bilateral shoulder flexion

bilateral shoulder abduction

Bilateral biceps curl

Able to transfer independently to the bed using bed lever;

doing leg drop outs

bilateral trunk rotation

On bed able to lift legs into bed, left leg minimal support from both Upper limbs

doing leg drop outs

bilateral trunk rotation

straight leg raise exercise right 80 left 90

Able to stand unsupported < 10 seconds. Pain level in back 6/10

Carer Kylie arrived

Seated extension causes an increase in pain- advised to practice sitting up then relaxing then sit up when feels able to progress into seated extension over hands as demonstrated.

Gait with frame; able to walk independently with frame, able to walk with a symmetrical gait pattern with left foot flat on the ground during stance. Reports drags as the day goes on/ uses foot splint.

Activity: Treatment - SCHS Rehab Community Physio (Care Plan) (120 minutes) Face to face with Patient

SCHS Rehab Community Physio performed (1 out of 28)

SCHS Rehab Community Physio Review next due on 22 Aug 2020 16:08

16 Jul 2020 13:38	Surgery: Lorraine Crampton (Healthcare Assistant) Entered at: Oldbury Health Centre
History: Initial contact made with pt 29/06 - pt staying with mum in hotel for a few days. She has requested a move with the council and has received back dated PIP payment. Care plan in place. Received meds. 06/07 - discharged from hospital after fall. Moved into more suitable housing temporarily. 13/07 - pt ran out of meds so has been ill. Has a plan in place so won't run out again. Having issues with meals as care plan an emergency plan and doesn't have set times.	
Plan: pt will call care company. I will contact the community offer to see what support can be put in place.

27 Jul 2020 17:44	Surgery: Dr Deborah Endersby (General Medical Practitioner) Entered at: Oldbury Health Centre	
-------------------	---	--

History: T/C to patient due to covid situation.

BNO for around 1 week. In quite a bit of abdo pain with this now.

Continence nurse said to speak to GP.

Usually has bowel motion every morning.

Has porridge and orange juice, high fibre diet. No diet changes.

Today has not felt like eating, has eaten only a handful of nuts.

Drinking fluids OK.

Feeling nauseous today.

Vomited after eating the nuts today.

Not passed wind today or yesterday.

Feels like there is stool about to come out.

Every now and again she has a small episode where she goes quite a few days without passing stool, but she is still passing wind. This is ongoing longer and more painful.

Back passage very uncomfortable. Period-type cramps in abdomen.

Has not taken any laxatives. Has not used before.

Plan: Start laxido and glycerol supps.

Expect result quickly with the suppositories. If symptoms worse tomorrow, or BNO by Wednesday then call again.

Additional SCR dataset uploaded under COPI Regulations (Y237d)

Glycerol 4g suppositories - 12 suppository - insert one twice daily as needed

Laxido Orange oral powder sachets sugar free (Galen Ltd) - 30 sachet - One twice daily

ETP2 FP10: Not Yet Printed - Signed

Summary Care Record Update - This patient's preference is for only core items to be included in their Summary Care Record. This has been overridden so that additional items will be included in this patient's Summary Care Record.

31 Jul 2020 17:56	Surgery: Dr Deborah Endersby (General Medical Practitioner) Entered at: Oldbury Health Centre	
-------------------	---	--

History: T/C to patient due to covid situation.

She had a fall today in her wheelchair. Was coming back from chemist, went to cross road, kerbstone was higher than expected and she fell forwards. She put arms and legs forward to catch herself.

She was strapped into wheelchair at the time.

Thinks she might have sprained her left ankle (the bad one). Doesn't think she's broken it. The bony areas are not tender.

Back and ankle are very sore.

Has had some tramadol and feeling better with this but pain.

In the usual way her left ankle sometimes drags

No new pain/weakness/numbness down the legs.

Bowel and bladder - has not been since the accident. (6hours now).

Plan: Reassured I think significant spinal injury is very unlikely here. Keep an eye on how the bladder is - if abnormalities on passing urine then needs to call 111 over weekend, however it is a hot day so likely this is the reason she has not passed urine yet.

History: Weight loss over past 12 months. This time last year was 102kg. Has been losing weight steadily over past 12 months. Has lost 30kg.

She eats well generally. She has increased her snacks.

Weight at Hallam Street was 72kg.

She has had to buy new clothes ++ over the past year.

Otherwise feeling well in herself.

Seen dietician in January who was happy with her diet.

Possible that she has been using more energy using crutches and wheelchair.

Plan: Check bloods and review with results. May need f2f appointment +/- further investigation as this is very significant weight loss.

Telephoned report (Xa1iV) - 10.20

Telephone call to a patient (XalgC)

Telephoned report (Xa1iV)

Actions (Xa1UI)

Send letter electronically

To contact wheelchair services and feedback to Marie.

Telephoned report (Xa1iV)

Call to follow up how Marie was doing;

Reports that she is frustrated that when she is bidding on wheelchair properties that her bids are being vetoed by the OT's at Social Services.

She does not understand why, for example she bid on a property with a lift access for a wheelchair and was told that she did not require a lift but needs a ground floor property as she needs to access the property via wheelchair.

Not walking indoors at present because her left sciatic pain has increased on the leg hand side of her shin- feels this is severe when she is walking or doing standing exercises for example marching. When she was trying to walk and do exercises in standing she was in such severe pain she needed to sit down the rest of the day.

Feels her low back pain has resolved and her right leg

She has self purchased a TENS machine; has some old packets of electrodes- advised that they can expire; not using at present. Finding this very useful as used to use for period pain previously.

Has sort advice from wheelchair charity advised that current wheelchair was too heavy and that she would be better using a titanium wheelchair and she has purchased this.

When seen by the Physiotherapist at SGH while in Hallam Street she was ordered a new wheelchair cushion 17 x 17 however now she has this new chair she needs a 16 x 16. Advised by wheelchair services that this needs to be a special order.

Said I was not clear about how she was not seen by wheelchair services in the first place. Said that Asia had advised her to self refer and she was told because she could walk inside that she was not eligible. She did tell Wheelchair Services that she was falling regularly when walking with the four wheeled walker that was provided by Equipment stores. They suggested she rent a chair from the British Red Cross, Marie felt it more cost effective to by a second hand chair, therefore she purchased her first chair.

Said I had no expertise in the provision of wheelchair cushions and I would need to seek advice from wheelchair services.

Said I was happy to send the letter electronically; repeated that she can gain access to her notes via the Trust legal department and to call Sandwell General Hospital.

Feels mental health has taken a bit of a dip at the start of the week, but is being kind to herself and realises that she is still doing a lot. Discussed the importance of changing position regularly and Marie reports that she has brought a garden chair that she can recline in and she is taking regular breaks when using the computer.

Can not do x 2 sets of 10 sitting and lying exercises, but has increased repetitions.

History: pt doing well. Her mum has been helping her this weekend. Discussed the VAT forms and that she is submitting. Housing officer has been in touch and chasing OT's for their report. She is being very positive and looking forward to the future. Discussed having Wiltshire Farm foods delivered until she moves into a property where she can cook safely or have meals prepared. She has asked if I can speak with Dr Endersby about having a fortnight or months medication pack, as it is difficult for her friend to collect at the moment and they will not deliver.

Plan: msg/rask Dr endersby re: prescription. Check in next week

07 Sep 2020 12:35	Surgery: Lorraine Crampton (Healthcare Assistant) Entered at: Oldbury Health Centre
-------------------	---

History: pt doing ok but pain in leg. Has spoken to Dr.

community navigator has been a good help.

bidding on bungelows.

she has been down due to living situation, but discussed how well she is handling things and her mental health is under control at present

Plan: call next week

07 Sep 2020 18:36	Surgery: Dr Deborah Endersby (General Medical Practitioner) Entered at: Oldbury Health Centre
-------------------	---

History: 1) Blood and stool results. TTG normal. Calprotectin bit raised, borderline range. Suggest repeat. Not taking nsads. She will arrange repeat when she receives the form.

2) Asking about meds. She has discussed possibility of antidepressant with the CPN. Feeling low. Sleep disturbed, getting irritable, does not want to go back to how things were. Sertraline suited best in the past looking at her notes - venlafaxine caused too much sedation so she stopped it, mirtazapine caused weight gain.

Under stress at present due to living at Manifoldia Grange but facilities not ideal eg cooker - both hobs dont work together, and saucepans are poor quality so she is getting mum/friends constantly to collect things from her flat.

Plan: She will do repeat calprotectin after 17 September.

Restart sertraline. Arrange in time with other scripts. She will start on Friday.

Speak again 2 weeks.

Additional SCR dataset uploaded under COPI Regulations (Y237d)

Sertraline 50mg tablets - 7 tablet - Take one daily (Future dated medication 16 Sep 2020)

History: T/C to patient. Lots of pain in back but otherwise OK.

Good friend died last week, cancer - expected but very hard. She will not be able to attend the funeral due to her mobility problems.

No side effects to sertraline. Has had 1 week so far.

giving up because of physical pain. It feels too difficult to achieve things. Moving as much as she can in the morning.

Uncomfortable in her chair, awaiting call abck from wheelchair services to see if they can help with this.

Spending a lot of time lying/sitting which is bad for her mood.

She uses PS4 an dhas a new game on this. Computer is at dining table so can only use this for 15 mins at a time.

Plan: Speak again 2 weeks appointment booked.

History: pt had a relapse this weekend, but contacted crisis team who are managing her meds on a daily basis. Reason for this is that she received a letter from surgeon to say that she had missed a TC that was booked on 28/09.

Marie stated that the letters received were for an appointment at The QE on 7/07, which was changed to 8/10.

She had not received any other communication to say this was change to a TC on 28/09. This upset her as she has been in so much pain and was hoping that the appointment with the surgeon. This is what triggered her relapse, but she didn't harm herself, she recognised she needed help.

increasing meds an Letter to housing officer to try to speed up move.

wheelchair services have been and measured - waiting on chair

Plan: To contact QE - Mr Metcalf or sec Katie Thompson 0121 371 6878

08 Oct 2020 17:15	Surgery: Dr Deborah Endersby (General Medical Practitioner) Entered at: Oldbury Health Centre History: T/C to patient. Review of mood. She was feeling low so called the crisis team, to keep herself safe about 1 week ago. They took her meds away but have given them back now. Had enough with the back pain and other concerns. Previous perpetrator of assault towards her has never been brought to justice in spite of her gathering lots of evidence, she has given up on this ever happening and does not want to follow things up with council or police any more. She was expecting an appointment with the hospital re her back pain today but it has been cancelled and rebooked. Waiting for her brother's care arrangements to be in place so that she knows her mother and brother will be OK. Then "I'll be free". Plans to take her life at this point by calling an uber to go somewhere, leaving her phone off/at home so her family cannot contact her, taking overdose of medicine. She has been in discussion with social services re her brother's care and they should get something sorted for next week. Declines anything further to manage pain - she has meds arriving tomorrow. She uses a support/ramp made by her dad which takes some pressure off her back. She sleeps on tummy as much as possible as this is more comfortable. She has not had sertraline in the medipack this week. However the psychiatrist wanted to increase the dose to 100mg. Plan: 1) Spoken to pharmacy - sertraline to be added to pack for tomorrow. 2 days at 50mg then increase to 100mg. Continue on repeat. 2) I phoned crisis team, spoken to Yasmin duty worker. They are aware of her. I discussed with Yasmin concerns about suicidal ideas and plans, does not seem appropriate to discharge on Monday, may need hospital admission for safety. They will speak to her tomorrow. I am not concerned about risk overnight at present. 3) Speak to patient again next week Thursday pm. Additional SCR dataset uploaded under COPI Regulations (Y237d) (R) Sertraline 100mg tablets - 7 tablet - Take one daily

Telephoned report (Xa1iV)

Return call to Marie re; Increase in left lateral calf pain in the last couple of weeks, intermittent, when lies down with extension device this is the only time she is pain free, unable to sit at present, unable to walk.

Started after fall backwards from wheelchair; was turning. Back felt all ok after fall but then got worse.

Phone review with Orthopaedic Surgeons on Monday 19th.

No new red flag symptoms; no new numbness between legs, no new pins and needles, no new numbness, no change in bladder or bowel- has been slightly constipated- relieved with medication.

Has been reviewed by GP, increased pregabalin.

Father has made her a plank to lie on so can watch TV- discussed pillow lifter. Will look at pillow lifter on the internet- to see if any good- feels that she can do this. Did not ring PT as did not think I would be able to do anything. Under the Crisis Team at present- have been today- has x 2 days of medication- will come again Friday.

Plan to call Thursday pm.

Telephone call to a patient (Xalgc)

Telephoned report (Xa1iV) - 16.00

-------------------	--

Telephoned report (Xa1iV)

Two falls out of chair- beginning of September second one 2 weeks after this, same falling when going backwards in wheelchair, and then going to turn.

All ready in pain when woke up this morning, slept last night before midnight, woke up 6.00 am with pain in lateral aspect of left calf and hip slept on tummy for a couple of hours.

Pillow lifters; does not think that would be helpful- has had a look in the internet; main problem is sitting, so limited.

Housing; under offer for a bungalow waiting for them to finish building; early November, waiting for offer.

Because in some much pain; no quality of life; pre-gabalin helping with the pain- vision blurred- couple of the weeks.

Double vision- seeing two things- 2 weeks. Not told GP about vision changes. .

Light photo phobic- keeping the blinds closed.

Finding getting constipated- pessary helps 2-3 times a week.

Spoke to CPN- Jen.

In severe pain- feels suicidal, no quality of life.

Left leg- 6 /10 flat on the couch with knees pulled up to chest talking to me.

Swallowing liquid ok- no other new weakness.

Fell off chair- got gradually worse after fall.

Actions (Xa1UI)

Wait for GP review this pm.

Monitor.

History: mental health record noted

they have stopped many of her medications and has recommended review of the pregabalin

i will review with patient and see if she is agreeable to try to reduce the dose

voicemail message no answer

spoke to patient re pregabalin she has poor pain control recently increased the dose of pregabalin

her neurosurgeon has suggested surgery waiting list

she would prefer to stay on the same dose

as alternate options are not necessarily safe except duloxetine as gabapentin and amitriptyline are similar risk for her

she is not keen so await surgery

History: pt doing really well.

Spoke with surgeon - he needs to operate again - waiting for date.

Change in meds has really helped and managing to sit up for 10 - 20 mins.

Stressing as Crisis team wants to change her meds. messaged Dr Endersby

Warley church delivered lunch on Friday. Really enjoyed it and looking forward to this weeks.

Plan: check in next week

22 Oct 2020 15:50	Surgery: Dr Deborah Endersby (General Medical Practitioner) Entered at: Oldbury Health Centre
-------------------	---

History: T/C to patient.

This week has been better. Pain better controlled on zomorph compared to tramadol. She was able to sit for a longer period of time by Monday.

I have spoken to chemist - at present Lansoprazole, pregabalin and solifenacin in packs. Circadin, carbamazepine and sertraline have been stopped.

Surgeon has put her on the list for repeat surgery.

She is concerned about stopping the sertraline. She feels it has been helping. Also she would like to continue on a stable dose. She was not happy with the psychiatrist deciding to stop it. Her CPN Jen also feels it would be good to have this. Understands the concern with polypharmacy, also understands the improvement with pain improvement.

Plan: Continue zomorph on weekly scripts.

After long discussion we agreed continue sertraline 100mg daily. Aware it might not be inside the pack this week. I will speak to pharmacy.

Additional SCR dataset uploaded under COPI Regulations (Y237d)

(R) Sertraline 100mg tablets - 7 tablet - Take one daily

(R) Zomorph 10mg modified-release capsules (Ethypharm UK Ltd) - 28 capsule - take TWO capsules twice daily

History: T/C to patient.

Feeling much more positive.

Motability car arrives Monday (for her to drive). She is really looking forward to having this.

New flat suiting her well.

Needs to register with new GP. Has not found which one as yet.

Pain still ongoing but manageable. Worse in leg than in back.

Surgery delayed due to covid but she is on the list for asap.

Plan: Speak again 3 December - review mood again and ensure no problems with meds supply as she moves GPs.

History: pt doing really well.

After op, was able to mobilise straight away. Has been walking round home.

Pain is mainly under control. Much happier.

Has registered with Great Barr surgery.

Has enough meds for the week.

Pt in such a good place now. Asked her to contct if there are any issues with the change over.

Plan: final check in - new year

Telephoned report (Xa1iV) - 15.00

Telephoned report (Xa1iV)

Return call to Marie

Advised that we discussed on the 22 October 2020 that as she was waiting for surgery and managing ok to discharge and await referral.

Had surgery last week and is doing really well

Advised we did not have a referral from the QE as yet but she can self refer back

I feel the MSK team would be the best team to see her now as more mobile and able to attend clinc; would be able to advise re;pain management- (please refer to letter from Mental Health)

Able to drive- has just driven to Solihull

Agreed to self refer MSK- has discharge letter from the QE

Number given.

No futher intervention from iCares

-------------------	--

No (Y0428)

Yes (Y0427)

O/E - presenting ROA (2732.) - Unsure - patient had spinal injury a few years ago so has to use a wheelchair most of the time, wheelchair was never adjusted to the patient's specifications so patient feels that this may have caused the pain and pins and needles in her leg - patient feels relief when crawling around her home instead of using her chair.

No (Y0428)

Every four months (XaB8H)

No (Y0428)

Presenting complaint (Xalm8) - L leg pain - has painkillers but they give the patient additional symptoms so prefers not to use them. Patient also feels sharp pain in her knee when kneeling on a hard surface also, like someone is sticking a pin in her knee. Has trouble bending the knee

No (Y0428)

Yes (Y0427) - Having investigations currently carried out for bowel problems as spinal injury may be affecting this - explained that we may need to reject referral until investigations have been completed.

Pre-treatment pain scale (Y018d)

Pain score (Ua2Bc) 10 -

On average, how intense was your pain (0 is "no pain" & 10 is "pain as bad as it could be")?: 8

Do you often feel unsure about how to manage your pain condition?: Yes

Over the last 2 weeks, have you been bothered a lot by your pain?: Yes

Have you only been able to walk short distances because of your pain?: Yes

Have you had troublesome joint or muscle pain in more than one part of your body?: Yes

Do you think your condition will last a long time?: Yes

Do you have other important health problems?: Yes

Has pain made you feel down or depressed in the last 2 weeks?: Yes

Do you feel it is unsafe for a person with a condition like yours to be physically active? (i.e. do you think you would do yourself harm being physically active): Yes

Have you had your current pain problem for 6 months or more?: No

No (Y0428)

No (Y0428)

No (Y0428)

No (Y0428)

Is worsening (Xa49W)

No (Y0428)

Yes (Y0427)

No (Y0428)

O/E - presenting ROA (2732.) - Cauda Equina Syndrome, Endometriosis acid reflux, mental health conditions; patient did not want to go into detail as too many to note and would take too long (call was around 14 minutes long at this point), will be able to gain more info on mental health during first consultation.

17 Feb 2017	Problem: Behavr synd assoc with physiological disturb and phys factor (X00Sw) - Behaviour disorder - Updated by PH on 12 Oct 2009. H: Patient reviewed (6A...) Stressed, had a tribunal for benefits claim. She is in work but off at present, but management not supportive now she says and may lose her job. She is struggling due to her stress and mental health so she had been using annual leave at times to cope and get through job. Has support worker Michelle from Peaches, who she is employing privately and has been funding by selling some of her items she says. She has tried before for trying to get support of similar nature but not qualified. Struggling with finances and at times can miss meals. Hx of BPD. Due to struggling, she is starting to get more morbid fleeting thoughts more, would not act on these at present and no preparations. Hx of OD's in past. Protective factors are the dangers she realised dangers from previous attempts and how much she upset family. She has a goal to get her own flat one day. Works for CAB. Sleep poor, has app't in a sleep clinic soon. She feels she needs the support of CMHT for further support. No current self harm. E: well kempt, good rapport, tearful, normal speech/behaviour P: refer PLS as she is at risk of deteriorating and due to previous risk factors. she is due f/u app't with Dr ACB. in meantime has number for crisis team and informed can attend A&E also if requires urgent input.			
09 Dec 2019	Problem: Behavr synd assoc with physiological disturb and phys factor (X00Sw) - Behaviour disorder - Updated by PH on 12 Oct 2009. Problem: Lumbar nerve root injury - L5 (SJ324) H: Review of medication. She was not given carbamazepine by the pharmacy but was given all her other meds. She therefore requests further carbamazepine. Also asks about dose increase. She was restarted back on carbamazepine as a mood stabiliser by crisis team after being off for about 1 month. Previously she had been stable on this since about easter. She found the nerve root injection helpful. She is not sleeping well - waking early in the mornings. P: She will speak with pharmacist about the carbamazepine as we have issued this with the other meds. Start pregabalin as per neuro letter. She thinks the dose is 100mg bd which sounds reasonable. She will let us know if it is a different dose.			
09 Dec 2019	Pregabalin 100mg capsules	take one twice daily	14 capsule	A

09 Mar 2015	Problem: Back pain without radiation NOS (16C6.) - Updated by PH on 12 Oct 2009. H: C/o hurt her back over the wkend just gone, was carrying a toddler, and as lifted twisted to swing him up onto shoulders. Lower back pain lumbar area, no radiation, no neuro Sx's, she finds sitting worse but finds moving around is better. has hx of overactive bladder, on vesicare for this. However over wkend had few episodes of incontinence, 3 saturday and 2 yesterday, bent down to do something, other time for instance stretched up to get something from shelf has experienced incontinence. E: (chaperone nurse Hannah Smith) power 5/5 LL's, sensation normal, O/E - reflexes normal (2A12.)right LL, O/E - reflexes diminished (2A15.)knee left reduced, ankles equivocal response bilat, SLR poor to assess due to pain limiting ability to perform this, O/E - rectal examination - NAD (25Q1.)normal anal tone and squeeze test, perianal sensation normal D: ?sciatica/disc related back pain P: D/w Mr Pichierri (SpR) QEh neurosurgery, (oncall consultant Mr Petrick), he advised analgesia for now, urgent MRI not required at present though some of the reflex reduction may indicate nerve irritation he says, however if further bladder Sx's or red flags to go A&E. has review appt wit ACB in 3/7, to ensure still attends for re-assessment of back/legs also. I advised her of red flags; weakness, incontinence urine/faceal, loss sensation perianal, increasing numbness/pins/needles legs to go straight to A&E as advised. Mental health currently stable, no suicidal thoughts, agreed script co-codamol, has had in past.

09 Oct 2009	History/symptoms (1....)		
-------------	--------------------------	--	--

History / symptoms - .She has Past h/o depression and possibly abused in past. She was under care of private psychologist in kings heath till April. She has lost her job and recently moved locally. Currently she is very low and has lots of financial problems. She lives alone. She has no pst h/o of suicidal attempts as per history. Unfortunately combination of depressive personality+past bad experiences with loss of job has made her very low and thoughts of suicide constantly in her mind She has not made any attempts i have spoken with duty worker lance he advised fax copy and some one from the team will speak and triage and decide ?crisis team(i doubt needed) or appt next week.If she has no contact and worsening advised casualty review 2/52 she will think about antidepressants

07 Jan 2010	Hospital patient (XE0p1)			
Updated by KK on 17 Apr 2010.				
07 Jan 2010	Drug overdose (Xa4eX)			MS
Updated by KK on 17 Apr 2010.				
07 Jan 2010	Patient reviewed (6A...)			
Patient turned up at Health centre at 6am with no shoes in freezing snow. Doesnt feel medication is working and came for help. Worried not coping at Home and needed to get out of flat. She is adamant however that she does not want to go into hospital. When asked why she is not wearing shoes says she hadn't planned to come to surgery First time left House in weeks. Normally feels anxious. Still expressing suicidal thoughts. Duty psych worker Vinny who also assessed today and agreed re bringing forward psych rev and alteration of meds Appt arranged next week Both agree appears to be more of a personality disorder here. Advised not safe re sleeping tablets at moment. Offered re transport home but that will have to finance this or calling member of family but refused this and said will walk home without shoes in freezing snow. Urged against this in view of physical implications.

13 Aug 2010	Diazepam 2mg tablets	take one at night	4 tab	A
13 Aug 2010	Patient reviewed (6A...)			
Patient attended to discuss her problems, she had OD of her anti-depressant last week. Is due to see mental health team. Following this she was prescribed hydroxyzine as not sleeping. these have not helped. She is hearing music all the time and cannot sleep. Mental health team aware. Agreed script few days of BZ. Advised her to contact Jean and ensure she is reviewed sooner. Advised she may well need to be on other medication for her mental health. Has not had any further suicidal thoughts. maintained eye contact, appropriate speech and facial expressions, not distressed, good rapport.

03 Sep 2010	Telephone encounter (9N31.)			
Cath Brown called today at 11:30 approx, tenancy support officer, visiting 2-3 times a week. Says concerned as patient is neglecting herself and not taking care of herself, not buying food, ?not eating, does not want any help, drinking lots of Tia maria. Also tenancy worker says patient is self-harming a lot recently, ?not taking her meds. Also yesterday was mentioning about ending it all but not mentioned this today although saying does not want to be around. Advised worker that home visit is arranged for today and dr will visit. PATIENT IS NOT AWARE THAT TENANCY WORKER HAS CALLED US.

18 May 2010	Telephone encounter (9N31.)		
-------------	-----------------------------	--	--

Seen Dr Ukpong yesetrdy, has no analgesia at home, was advised PCM, wants script. Script done.

18 May 2010	Paracetamol 500mg tablets	take 1 or 2 4 times/day	100 tab	A
28 May 2010	Her advocate rang Lesley adams from hallam St Still abdo pain Wants to be refd RHH Offered OPA with me 1/6 @11.40 If severe pain can be seen this pm Needs to ring			
22 Jul 2010	Tina from positive choices rang. Info- Pt attended recovery class in a group yesterday to help pt make self recovery plan as per NHS guidelines. Pt walked out half way saying she didnt want any more input. I am due to review 4/52 NFA			
06 Aug 2010	Telephone encounter (9N31.)			

the zopiclone is not working soe i have added hydroxyzine.

10 Aug 2010	Hydroxyzine 25mg tablets	take one or 2 as directed at night	10 tab	A
-------------	--------------------------	------------------------------------	--------	---

Ended early on 13 Aug 2010: Discontinued (The authorisation for this acute was discontinued. No Longer Required)

13 Aug 2010	Telephone encounter (9N31.)		
-------------	-----------------------------	--	--

Called to say the hydroxyzine are not working for her. Advised there are not many options if tried zopiclone and hydroxyzine, advised we may need to look into her Sx for depression a bit further. She has appt next tuesday and will do this then.

03 Sep 2010	Cath Brown called today at 11:30 approx, tenancy support officer, visiting 2-3 times a week. Says concerned as patient is neglecting herself and not taking care of herself, not buying food, ?not eating, does ot want any help, drinking lots of Tia maria. Also tenancy worker says patient is self-harming a lot recently, ?not taking her meds. Also yesetrdy was mentioning about ending it all but not mentioned this today although saying does not want to be around. Advised worker that home visit is arranged for today and dr will visit. PATIENT IS NOT AWARE THAT TENANCY WORKER HAS CALLED US.			
03 Sep 2010	Telephone encounter (9N31.)			

Patients mother called to at approx 17:50 to say Marie has been admitted to hospital I advised Dr ACB had been out this pm and no answer at door despite several attempts at door. She was in process of informing crisis team of situation. Sandwell EAU. Says they need to know what medications she is on. Called EAU and spoke to nurse looking after patient who says they have blister pack of her meds and do not require further info. I confirmed with them what is in the blister pack coincides with our records for meds.

06 Sep 2010	Took OD 3/9 oil of wintergreen went to cas Discharged herself and readmitted by police Discharged following day says she took Od as auditory hallucinations taking mirtaz and venlafax suggest stop mirtaz Also on zopicolne risperidone and alcohol has fallen out with father agrees to engage with crisis team and simpson st mane			
29 Nov 2010	Phoned sainsburys 541 1875Pt to collect ppns every WED Couldnt leave mssge on her phone so sent pt a letter			
01 Dec 2010	patient came here to collect meds. rang sainsburys who have her script for 28 days. sainsburys are still unhappy with arrangements so are goin to ask her to use whites or lloyds because they are unhappy about not being able to have 4x7 days supply on one day. explained we can give 28 days and they can issue her 7 days meds every wed.			
03 Dec 2010	same problem with scripts and issuing weekly - local chemist will not deliver to where she has moved in tipton - discussed with BA and he advised that she will need to find another GP more local and a chemist who is prepared to delivery to her weekly meds. kal.			
15 Dec 2010	boots in great bridge will do a weekly medi-pak and delivery to pt as agreed with ac.we can issue a monthly script. boots great bridge 557 6673. Boots will collect RX from us.			
17 Dec 2010	Boots great bridge called regarding patients script not being here to collect, also another patient as also asked for the script today. Her father called up yesterday to check if it was ready and must have collected it for her as it is no longer in the script box. CG			
03 Feb 2011	boots rang they do the medi pak apparently she had script 28 days before had zopiclone and temazepam should only take tamazepam rang mother she asking her to take meds back to chemist they will give her a new medipak			
01 Apr 2011	Telephone encounter (9N31.)			

1.4.11 spoke to heather (boots) 557 6673 script for patient reprinted. heather said she would collect 4.4.11 i did offer to fax or send it via post.

Updated by PH on 15 Apr 2011.

18 May 2011	Heather from boots GB called re change of meds - asked if we can notify in future of any changes to meds.			
19 May 2011	Father rang fred brown to inform us of her deteriorating condition I explained an OPA had been made for her today. he was unaware of this			
07 Jul 2011	Dr Ebuka rang Hallam St Marie IP Needs NE again Ok to restart Was stopped because of recurrent			

	overdose
28 Nov 2012	spoke to boots in great bridge. melatonin should be mr tabs. have amended comp and boots will return 3wks scripts to have mr handwritten on.
28 Nov 2012	SPOKE AGAIN WITH BOOTS. NEED IT TO BE PRESCRIBED AS CIRCADIN MR TABS.

out of hospital 2 weeks; self discharged; thoughts of self harm but not actively intending to do so; not sectionable; increase sertraline to 100mg daily; CMHT to visit; see SOS
Updated by BR on 08 Jan 2010.

16 Dec 2009	Home visit (XaBQf)		
-------------	--------------------	--	--

Still low in self. Finding evening worse. Marie was being visited by Father at time. Is not sleeping in night Had been given some of Mums temazepam 2 x 10mg tab (1 left in pack) no relief. Partly due to environment as noisy neighbors but also due to recurring worrying thoughts. Is facing possible eviction after falling into arrears after medical health problems and not keeping up with medical notes. Is adamant does not wish to go back into Hallam street as feels nothing that can be done there that is not being done at Hoem. Good support network of Friends. Minimal alcohol intake. Smoker.. Is trying to avoid contact with Mum at present as she feel her mum is obsessing about putting her into hospital but Dad is visiting regularly Due to see Judy Schmid today. Occasional suicidal thoughts Had been on sertraline 100mg for only 4 days before med was discontinued after overdose 6/7 ago. Took paracetamol x68 with alcohol and was discharged after blood tests. No jaundice or vomiting. Appears lucid and appropriate conversation do not feel can section or admit to hospital at present in light of this Has mental capacity. Advised to restart sertraline 100mg od as weekly script s Rv in 1 week

22 Jun 2010	Home visit (XaBQf)

03 Sep 2010	Home visit (XaBQf)		
Tenancy support worker rang earlier in day to say she had visited marie and she was drinking XS C2H5OH tab non compliance feeling dizzy. When i arrived no reply at home couldnt leave message on phone Rang dad. Eventually traced support worker Informed she was in hospital after ?OD Updated by ACB on 06 Sep 2010.			
03 Sep 2010	Telephone encounter (9N31.)		
Cath Brown called today at 11:30 approx, tenancy support officer, visiting 2-3 times a week. Says concerned as patient is neglecting herself and not taking care of herself, not buying food, ?not eating, does ot want any help, drinking lots of Tia maria. Also tenancy worker says patient is self-harming a lot recently, ?not taking her meds. Also yesetrd day was mentioning about ending it all but not mentioned this today although saying does not want to be around. Advised worker that home visit is arranged for today and dr will visit. PATIENT IS NOT AWARE THAT TENANCY WORKER HAS CALLED US.			
03 Sep 2010	Telephone encounter (9N31.)		
Patients mother called to at approx 17:50 to say Marie has been admitted to hospital I advised Dr ACB had been out this pm and no answer at door despite several attempts at door. She was in process of informing crisis team of situation. Sandwell EAU. Says they need to know what medications she is on. Called EAU and spoke to nurse looking after patient who says they have blister pack of her meds and do not require further info. I confirmed with them what is in the blister pack coincides with our records for meds.

Coming up to winter you might need help with irritating winter viruses such as coughs, sore throats and colds. No need to visit your GP speak to your pharmacist for quick accessible help. <http://bit.ly/2tiBs9K> #selfcareweek #selfcareforlife

23 Nov 2019	Short message service text message sent to patient (XaMil)		
-------------	--	--	--

Apologies for any confusion Self Care Day will be held at Oldbury Health Centre on FRIDAY 22nd NOVEMBER 2019 and not the 20th November as per previous text. Any questions please call 0121 543 1266 Kind Regards Dr Andreou and Partners

23 Nov 2019	Short message service text message sent to patient (XaMil)		
-------------	--	--	--

It's #selfcareweek Antibiotics don't help with viruses such as sore throats, coughs or colds. The pharmacist can help with advice on symptom relief. Remember community pharmacies deliver accessible health care in the community so people can take care of their health and #selfcareforlife Think #selfcareforlife during #selfcareweek and always.

13 Jan 2020	Community clinic note (XalkM)		
-------------	-------------------------------	--	--

Walks with stick due to hip injury was attacked by neighbour resulting in Cauda Equine Syndrome.

13 Jan 2020	Community clinic note (XalkM)		
-------------	-------------------------------	--	--

13 Jan 2020	Reason for referral (XalpS)		
-------------	-----------------------------	--	--

Weight loss, low albumin, poor daily diet.

13 Jan 2020	Community clinic note (XalkM)		
-------------	-------------------------------	--	--

This lady lost weight after suffering an injury and being in too much pain to stand and cook. She relied on take aways until carers were put in place to help with cooking. She was a lot in a lot of pain which resulted in her having frequent episodes of vomiting. There were times when Marie would miss a whole day's meals.

At present Marie orders from Gusto which she gets 10/11 meals from the ingredients per week. She tops up her shopping with Ocado deliveries of organic vegan meals.

She no longer misses meals and is currently changing to a plant based diet.

She intends to take a Multivitamin supplement as she is aware that she is at risk of B12 deficiency. She has previously been Vit D deficient.

I have no concerns with her diet at present. She is eating regular healthy meals and has a basic knowledge of

nutrition.

Aim: To promote weight maintenance with a healthy diet.

Plan:

1. Continue to eat regular healthy meals.
2. Check Vit D, Vit B12 and iron status requesting blood test from GP.
3. Marie to monitor weight.

Any further concerns regarding weight loss GP to re refer.

I will review on request.

13 Jan 2020	Community clinic note (XalkM)		
-------------	-------------------------------	--	--

Previous weight loss pt. gone from size 22- size 14 in clothing. (- 20lbs)

Now slowed down. Pt. happy with weight loss.

21 Jan 2020	Telephoned report (Xa1iV)		
-------------	---------------------------	--	--

Returning phone call - pt reported having difficulties at home - in particular getting in/out the bath, causing a lot of pain and discomfort. Has had 1 shower in the past month with assistance from her mum, carers come to help wash her but unable to get legs over the bath. Reported also been having difficulties getting off the toilet. Reported has been to her GP and been referred to MSK and completed the back screening referral tool. The GP has increased the pregabalin which has allowed her to increase her AROM within pain free limits. Has been having to use a mobility scooter when been going out, explained I can order a 4 wheeled walker to assist with outdoor mobility. As I won't be in again until 11th Feb I will refer to an AP to assess outdoor mobility with 4WW.

Please call the practice if you wish to cancel any pre-booked appointments, for any other conditions not related to COVID-19. We will not be pre-booking any face-to-face appointments until further notice. If you have a new continuous cough OR High temperature, please DO NOT attend the surgery but follow the advice in the previous text message. Patients will be offered a telephone consultation for any other non-flu like symptoms. Dr Andreou & Partners			
23 Mar 2020	Telephoned report (Xa1iV)		
Reported surgery went well - reported no changes to sensation, power is improving, pain is improving. Fell a couple times since surgery - last week she blackout out for a few minutes, felt like she was having a seizure, did not ring her GP. But her back has been hurting her a lot more since. Bladder control has worsened since the surgery. No excessive sweating. Advised pt to ring her GP to review BP - explaining current situation. No signs of COVID-19

06 Apr 2020	Telephoned report (Xa1iV)		
-------------	---------------------------	--	--

Reported having bought herself a secondhand wheelchair on Friday. Reported being pain free since then, feeling much happier. Has actually been able to do some exercises due to being in no pain. Experiencing some discomfort in her back but she can cope with this. Reported having a fall yesterday morning in the shower. Right leg gave way hit her left arm and head on the bath. Able to get herself up independently, carer present in the property at the time of the fall - reported no need to ring the paramedics. Prior to getting the wheelchair on Friday reported feeling suicidal. Reported Googling how to make a noose, noticed a number to ring if feeling suicidal, recognised she was in a crisis and rang her GP and mental health nurse. Also spoke to her sponser. Reported having bipolar disorder and this can happen quickly. Reported using her skills to assist her out of this crisis. Reported GP has increased her pregabalin. Completing exs with carers - marching on spot and swaying due to feeling unsure and scared of falling. Reported using upper limbs a lot to support herself. Suggested to complete sit to stand exs instead - focusing on equal weight bearing with feet, using upper limbs to push of the wheelchair, maintain equal weight bearing and then sit down. Encouraged to maintain static standing with limited support from upper limbs, again equal weight bearing. Advised to be aware of any movements in the chair or lying she can make without increasing pain - eg straight leg raise in lying. Try to complete some movements throughout the day without increasing pain. Try to mobilise 2-3 times per day depending on pain levels. Potential to lose strength from mobilising less. Pt reported feeling in much better spirits. Does not require any further intervention regarding her mental health.

-------------	---------------------------	--	--

Reported has been without pregabalin for a few weeks now - reported difficulties getting prescription from GP - was offering tramadol, but pt knows this was not suitable. On Saturday night her carer was concerned she had overdosed - pt reported the box had incorrect labelling and tried to reassure carer that she hadn't overdosed. 999 called - went to Russells Hall - given fluids and blood tests came back negative.

Pt reported pain is worsening - feels worse than prior to surgery. Has had 3 falls in the past week, 2 episodes of no bladder control - emptying bladder fully (Normally just a little leak).

Feels her mental health is struggling and doesn't take much to trigger a crisis with her bipolar disorder.

20 Apr 2020	Failed encounter - no answer when rang back (9N4C.)		
20 Apr 2020	Telephoned report (Xa1iV)		

Reported having a discussion with friends in the medical profession - reported having had a few overdoses between 2010-2014 and having been in a coma for 6 days. Her medical friends reported she may have had toxic anoxia and so may benefit from a CT head.

Reported feels having an understand of whats going on may help her deal with her BPD and executive functioning. Explained I feel that her management would not change if she was to have a head CT and diagnosis of brain damage. Explained she would mainly benefit from OT input for cognitive rehab however, this may not be urgent at present. Explained I have contacted the GP and awaiting a call back - have requested that he look at the notes on the system to organise a spine MRI. Her mental health nurse has reported she feels Marie has autism - Marie is adamant that she doesnt as she has a very good understanding of autism, and so has stopped her weekly CBT phone calls with this nurse. Reports this will not be at a detriment to her mental health.

Using the wheelchair all week. Has been doing marching on the spot, lateral sway still causing pain, reaching within base of support without pain. Has had 1 fall on saturday, in the evening going to the toilet.

Call to Marie to discuss decline in mobility

Had another fall this morning getting out of bed.

Misjudged the chair in the dark and fell onto the floor and to wait for carer to help her up.

Verbal consent for me to call Mr Metcalfe

06 May 2020	Telephoned report (Xa1iV)		
06 May 2020	Telephone call to a patient (Xalgc)		
06 May 2020	Telephoned report (Xa1iV)	12.00	
06 May 2020	Telephoned report (Xa1iV)		

Called Neurosurgical reg on call at the QE on 0121 627 2000 spoke to Wai Cheong re; 1. Deteriorating mobility since the 12th March 2020 since fall. Now using a wheelchair for mobility, described gait pattern as per notes. 2 Increase urinary incontinence no new numbness, new intermittent paraesthesia on feet, no new pins and needles.

Would discuss with Mr Metcalfe and the proposed plan is for her to come into a hot clinic in the next 24- 48 hours.

06 May 2020	Telephoned report (Xa1iV)		
06 May 2020	Telephoned report (Xa1iV)		

Call to Marie to inform her that I had spoken to the Neurosurgical Reg Wai Cheong re; her poor mobility and that they would ring her and update her with the clinical plan. Hopefully they will get her in to be seen in the near future.

Explained that if her weakness in her legs got suddenly worse or she experienced an deterioration in her bowel or bladder symptoms or new numbness or pins and needles to call 999 in the meantime.

Marie told me that because she had the operation she had been told that would not happen, I said I appreciated that but the decompression has only been happened at one level and the decline in her mobility had been gradual, I did not know what was happening with the rest of her spine and to call 999 if the above symptoms occur.

Marie did agree she would seek help urgently if needed.

Reported that she was given the number by Asia to call wheelchairs.

11 May 2020	Telephoned report (Xa1iV)		

Call to SW Maozitho on 07557296322.

Discussion re; re housing

Unsafe in current property

Appears to have had a deterioration in current mobility- I would not have attempted the stairs or outdoor walking

Self purchase of chair approx 1/12 ago

Await feedback from RRH

To call back and update once seen by Maozitho.

12 May 2020	Telephoned report (Xa1iV)		
-------------	---------------------------	--	--

Call to Wendy OT on B4 at RRH Hospital Maire was discharged last night, admitted through ED due to new bowel symptoms

Urgent MRI- showed L4/L5 disc extrusion

No cauda equina symptoms

To be managed conservatively

Has follow up apptn at the QE

Discussed that I had only seen Marie for the first time last week and had contacted the spinal reg on call re; her deterioration in mobility now using wheelchair and could do stairs with my colleague, however I did not feel that it would be safe to attempt to do the stairs with her. The plan originally was for a MRI Sat and clinic Mon 11.05.20. Discussed that Marie is unsafe to walk with walker- I had advised this before this admission on the visit when last seen.

Discussed that she can not acces the toilet and bathroom with wheelchair and she has refused a commode- refused on the ward also.

Marie has developed an intermittent foot drop in her left foot approx every 4th step.

Discussed this is new.

Ms strength on the bed 4+/5 left LL and right LL 5/5

Advised no to do forward flexion - ?has been doing sit ups?

To follow up tomorrow at home.

12 May 2020	Telephoned report (Xa1iV)	10.00	
12 May 2020	Telephoned report (Xa1iV)		
13 May 2020	Telephoned report (Xa1iV)		
13 May 2020	Telephoned report (Xa1iV)		

Phone call to Marie, patient transport would not take her for the MRI or to the hot clinic as only taking oncology patients or radiology patients.

On the 9th May was incontinent of urine when sleeping and rung 11 for advice, ambulance sent and then admitted.

Had emergency MRI- central disc protrusion? but has had a discectomy.

Will not be able to attend hot clinic at the QE because she can not do the stairs and needs hospital transport.

Still has cattle prod feeling gluteal cleft left buttock and left calf pain radiating down into left foot, comes in intermittent waves then eases off.

Told not to walk by OT.

Lying in bed takes the pressure off and lying back in chair.

Has been told to self isolate

Was doing sit ups as part of normal routine, aware not to do now

P= to review 3 June 2020 at 11.00

Dear Patient, A new health app is now available to download free via your app store or Google play store, "SWB Health App". The app will check your symptoms and give you access to the right service for you, either for self care or to make an appointment yourself using the app based on your symptoms. The app links directly with your GP practice. Please use this app if you need to check your symptoms or book an appointment. www.mygp.io/lwz

21 May 2020	Telephoned report (Xa1iV)		
-------------	---------------------------	--	--

Call to Marie, apologised re; my mistake that she had been admitted. Was at the QE via ambulance on the 16.05.20 and discharged home, seen by PT who reviewed scans and talked the the Neurosurgical Consultant who advised conservative management and referral to the pain clinic at Russell's Hall. Has had some left ankle pain with insidious onset that was present when she went to A and E, muscle power was checked when she was in A and E but no one looked at her ankle. 8/10 pain at rest. No falls, swelling just above ankle when you push it it does not leave a mark the fluid moves to the other side, not red or hot to touch. Left calf not hard, hot, swollen or painful. Advised to walk as much as possible but Physio did not assess walking, reports he was happy with her Muscle strength. Told not to use AFO issued by Russells Halls PT. No new sensory symptoms.

Seen in the Hot Clinic with Dr Inam who advised to wait and be reviewed, told to walk as much as possible. Feels very uncertain re; changes in medication, does not feel any better after attending A and E or clinic apptn.

Discussed only option if ankle remains painful to have an x-ray and to contact GP re this or to call 999 if it becomes swollen, red, hot in both her ankle and or her calf.

Advised not to walk with frame based on my last assessment with her.

Does not want commode, feels that she can manage the toilet.

Said I can see if I can talk to Dr Inam. To see on the third as planned.

Call from Elsa Matthews PT at Hallam Street re; Marie- has had x1 witnessed fall with four wheeled walker.

Discussed management to date; seen x2.

? Some functional element to her gait pattern

Very distressed by social situation with neighbours and I feel that her mobility is unlikely to change until her environment changes. Advised Elsa I had not checked her home program and this was next on our list to do.

P= to await feedback from Hallam Street.

'elsa.mathew@nhs.net'

Mon 22/06/2020 16:03

Hi Elsa,

Thank you for your call the other day.

Please find attached the letter I sent to the Housing Officer; re MB.

Kind regards,

Discharged from Hallam.

Sleeping on the sofa because the flat was not deep cleaned, used bedding on the bed.

Now transferred to another flat for another few nights. Staying there until new flat available.

Wants to continue rehab. In Manifolda Grange review Wed 15th July 2020 at 13.30

03 Jul 2020	Short message service text message sent to patient (XaMil)		
-------------	--	--	--

For your safety as well as the safety of other patients and our staff, as of Thursday 2nd July a face covering MUST be worn before entering the building (Oldbury Health Centre) with the exception of under 5's and anyone with underlying conditions as per government guidelines. Thank you for your cooperation. Dr Andreou and Partners. DO NOT REPLY.

URGENT WARNING: There has been a rapid rise in COVID-19 cases across Sandwell, particularly in Smethwick. The virus has NOT gone away. Stick to social distancing & self-isolation guidance. If going out, maintain a distance of at least 1 metre & wear a face covering. If you experience symptoms, self-isolate at home & get tested. Anyone in the household must also self-isolate. This saves lives. For more info: www.nhs.uk/coronavirus. Oldbury Health Centre

PATIENT SCREENED NONE

06 Aug 2020	Telephoned report (Xa1iV)		
-------------	---------------------------	--	--

Call to follow up how Marie was doing;

Reports that she is frustrated that when she is bidding on wheelchair properties that her bids are being vetoed by the OT's at Social Services.

She does not understand why, for example she bid on a property with a lift access for a wheelchair and was told that she did not require a lift but needs a ground floor property as she needs to access the property via wheelchair.

Not walking indoors at present because her left sciatic pain has increased on the leg hand side of her shin- feels this is severe when she is walking or doing standing exercises for example marching. When she was trying to walk and do exercises in standing she was in such severe pain she needed to sit down the rest of the day.

Feels her low back pain has resolved and her right leg

She has self purchased a TENS machine; has some old packets of electrodes- advised that they can expire; not using at present. Finding this very useful as used to use for period pain previously.

Has sort advice from wheelchair charity advised that current wheelchair was too heavy and that she would be better using a titanium wheelchair and she has purchased this.

When seen by the Physiotherapist at SGH while in Hallam Street she was ordered a new wheelchair cushion 17 x 17 however now she has this new chair she needs a 16 x 16. Advised by wheelchair services that this needs to be a special order.

Said I was not clear about how she was not seen by wheelchair services in the first place. Said that Asia had advised her to self refer and she was told because she could walk inside that she was not eligible. She did tell Wheelchair Services that she was falling regularly when walking with the four wheeled walker that was provided by Equipment stores. They suggested she rent a chair from the British Red Cross, Marie felt it more cost effective to by a second hand chair, therefore she purchased her first chair.

Said I had no expertise in the provision of wheelchair cushions and I would need to seek advice from wheelchair services.

Said I was happy to send the letter electronically; repeated that she can gain access to her notes via the Trust legal department and to call Sandwell General Hospital.

Feels mental health has taken a bit of a dip at the start of the week, but is being kind to herself and realises that she is still doing a lot. Discussed the importance of changing position regularly and Marie reports that she has brought a garden chair that she can recline in and she is taking regular breaks when using the computer.

Can not do x 2 sets of 10 sitting and lying exercises, but has increased repetitions.

Best lying on back with back support body tech board- can lye on the floor and not in any pain watches TV and on play station.

Using Tens when out.

Wheelchair coming Tuesday 25th August to review.

Still doing exercises from Elsa- still not doing x 3 sets of 10; arms getting easier but still finding leg exercises difficult.

Viewing property tomorrow with OT and if not suitable will be to put in recommendation.

To call back when needs reviewing.

14 Oct 2020	Telephone call to a patient (Xalgc)		
14 Oct 2020	Telephoned report (Xa1iV)		

Return call to Marie re; Increase in left lateral calf pain in the last couple of weeks, intermittent, when lies down with extension device this is the only time she is pain free, unable to sit at present, unable to walk.

Started after fall backwards from wheelchair; was turning. Back felt all ok after fall but then got worse.

Phone review with Orthopaedic Surgeons on Monday 19th.

No new red flag symptoms; no new numbness between legs, no new pins and needles, no new numbness, no change in bladder or bowel- has been slightly constipated- relieved with medication.

Has been reviewed by GP, increased pregabalin.

Father has made her a plank to lie on so can watch TV- discussed pillow lifter. Will look at pillow lifter on the internet- to see if any good- feels that she can do this. Did not ring PT as did not think I would be able to do anything.

Under the Crisis Team at present- have been today- has x 2 days of medication- will come again Friday.

Plan to call Thursday pm.

15 Oct 2020	Telephoned report (Xa1iV)		
-------------	---------------------------	--	--

Two falls out of chair- beginning of September second one 2 weeks after this, same falling when going backwards in wheelchair, and then going to turn.

All ready in pain when woke up this morning, slept last night before midnight, woke up 6.00 am with pain in lateral aspect of left calf and hip slept on tummy for a couple of hours.

Pillow lifters; does not think that would be helpful- has had a look in the internet; main problem is sitting, so limited.

Housing; under offer for a bungalow waiting for them to finish building; early November, waiting for offer.

Because in some much pain; no quality of life; pre-gabalin helping with the pain- vision blurred- couple of the weeks.

Double vision- seeing two things- 2 weeks. Not told GP about vision changes. .

Light photo phobic- keeping the blinds closed.

Finding getting constipated- pessary helps 2-3 times a week.

Spoke to CPN- Jen.

In severe pain- feels suicidal, no quality of life.

Left leg- 6 /10 flat on the couch with knees pulled up to chest talking to me.

Swallowing liquid ok- no other new weakness.

Fell off chair- got gradually worse after fall.

Return call to Marie

Advised that we discussed on the 22 October 2020 that as she was waiting for surgery and managing ok to discharge and await referral.

Had surgery last week and is doing really well

Advised we did not have a referral from the QE as yet but she can self refer back

I feel the MSK team would be the best team to see her now as more mobile and able to attend clinic; would be able to advise re; pain management- (please refer to letter from Mental Health)

Able to drive- has just driven to Solihull

Agreed to self refer MSK- has discharge letter from the QE

Number given.

No further intervention from iCares

Active Problem: Telephone encounter (9N31.) (29 Nov 2010 - Ongoing)

07 Dec 2009	replied call to mum Elizabeth sucliffe/contacted the daughter she seems betetr than before she ha snoi issues to discuss says may be ehr mum waned repeat script and discuss about her .she is under hospiatl care going to attend group thursday .she will conveythe message to her mum if any issues to call I backl message left inher answer phone
15 Dec 2009	with Home treatment team spoken to Michael Rodney Fax sent from sarah Cherrington re request for Sertraline have been informed patient took overdose of sertraline and paracetamol 4/7 ago. Medication was reported in fax to have been taken away by Police and patient was discharged from Hospital. Michael informs me no further contact has been made from HTT over weekend and was unclear hwhen FU due but thinks may be tomorrow. In view of concerns re suicidal ideation visit scheduled to see patient today.
15 Dec 2009	Atte,pted to call patient all morning no answer. Visit scheduled Home visit attempted Rang doorbell for 10 minutes no answer.Eventually contacted byt welephone - was frigtened to answer door as Mum has allegdely been trying called ambulance 4 x in last fe wdyas to take her back to Hopsital as cocnerved re risk of Overdose. Maried sounds failry lucid HTT have requested script of sertraline but Overdose on paracetamol last week and has informed me is still ahving occaisona l suicidal thoughts bu trying not to at on them.Has been in Hallam steret as inpatient nefore and does not wish to go back Feels that constant upheabal and mobing from wards and differnt staff increases heranxiety lebes. Experiencing ongoing stress Recent HO LT abdo pain now resolved btu led to loss of job and now undergoing hearing re possible eviction from Hous HAS GOOD FAMILY SUPPPORT howvere currentyl living alone. Agreed will rv mane and sissue script maneif nec. Hava tteted ot contact sarah Cherrington on 2 occaisons but unsuccessful Is aw Appt with Judy schmid at surgery mane but feels unable to get up o surgeryHave informed Judy's team as she is off duty today and will try HTT again mane. Patient is not experincing any withdrawal sx off SSRI and agreed wil represcribe on rv mane
11 Jan 2010	Mum contacted to say Marie took overdose at we and is in observatio btu lkand sto dischare Rang in despair as cocnerved that is bouncng in and out and does not feel she is afe in Hoem Eplane dufort cannot blocok decison re discharge vut to nform us once discharged re assessment. Mum vocied cocnenres re social support for marie and advsied that social team need to be involved.
18 May 2010	Seen Dr Ukpong yesetrdy, has no analgesia at home, was advised PCM, wants script. Script done.
28 May 2010	Her advocate rang Lesley adams from hallam St Still abdo pain Wants to be refd RHH Offered OPA with me 1/6 @11.40 If severe pain can be seen this pm Needs to ring
22 Jul 2010	Tina from positive choices rang.Info- Pt attended recovery class in a group yesterday to help pt make self recovery plan as per NHS guidelines. Pt walked out half way saying she didnt want any more input. I am due to review 4/52 NFA
06 Aug 2010	the zopiclone is not working soe i have added hydroxyzine.
13 Aug 2010	Called to say the hydroxyzine are not working for her. Advised there are not many options if tried zopiclone and hydroxyzine, advised we may need to look into her Sx for depression a bit further. She has appt next tuesday and will do this then.
03 Sep 2010	Cath Brown called today at 11:30 approx, tenancy support officer, visiting 2-3 times a week. Says concerned as patient is neglecting herself and not taking care of herself, not buying food, ?not eating, does ot want any help, drinking lots of Tia maria. Also tenancy worker says patient is self-harming a lot recently, ?not taking her meds. Also yesetrdy was mentioning about ending it all but not mentioned this today although saying does not want to be around. Advised worker that home visit is arranged for today and dr will visit. PATIENT IS NOT AWARE THAT TENANCY WORKER HAS CALLED US.
03 Sep 2010	Patients mother called to at approx 17:50 to say Marie has been admitted to hospital I advised Dr ACB had been out this pm and no answer at door despite several attempts at door. She was in process of informing crisis team of situation. Sandwell EAU. Says they need to know what medications she is on. Called EAU and spoke to nurse looking after patient who says they have blister pack of her meds and do not require further info. I confirmed with them what is in the blister pack coincides with our records for meds.
06 Sep 2010	Took OD 3/9 oil of wintergreen went to cas Discharged herself and readmitted by police Discharged following day says she took Od as auditory hallucinations taking mirtaz and venlafax suggest stop mirtaz Also on zopicolne risperidone and alcohol has fallen out with father agrees to engage with crisis team and simpson st mane

29 Nov 2010	Telephone encounter (9N31.)			
Phoned sainsburys 541 1875Pt to collect ppns every WED Couldnt leave mssge on her phone so sent pt a letter				
01 Dec 2010	patient came here to collect meds. rang sainsburys who have her script for 28 days. sainsburys are still unhappy with arrangements so are goin to ask her to use whites or lloyds because they are unhappy about not being able to have 4x7 days supply on one day. explained we can give 28 days and they can issue her 7 days meds every wed.			
03 Dec 2010	Telephone encounter (9N31.)			
same problem with scripts and issuing weekly - local chemist will not deliver to where she has moved in tipton - discussed with BA and he advised that she will need to find another GP more local and a chemist who is prepared to delivery to her weekly meds. kal.				
15 Dec 2010	Telephone encounter (9N31.)			
boots in great bridge will do a weekly medi-pak and delivery to pt as agreed with ac.we can issue a monthly script. boots great bridge 557 6673. Boots will collect RX from us.				
17 Dec 2010	Telephone encounter (9N31.)			
Boots great bridge called regarding patients script not being here to collect, also another patient as also asked for the script today. Her father called up yesterday to check if it was ready and must have collected it for her as it is no longer in the script box. CG				
03 Feb 2011	boots rang they do the medi pak apparently she had script 28 days before had zopiclone and temazepam should only take tamazepam rang mother she asking her to take meds back to chemist they will give her a new medipak			
01 Apr 2011	1.4.11 spoke to heather (boots) 557 6673 script for patient reprinted. heather said she would collect 4.4.11 i did offer to fax or send it via post. Updated by PH on 15 Apr 2011.			
18 May 2011	Telephone encounter (9N31.)			
Heather from boots GB called re change of meds - asked if we can notify in future of any changes to meds.				
19 May 2011	Telephone encounter (9N31.)			
Father rang fred brown to inform us of her deteriorating condition I explained an OPA had been made for her today. he was unaware of this				
07 Jul 2011	Telephone encounter (9N31.)			
Dr Ebuka rang Hallam St Marie IP Needs NE again Ok to restart Was stopped because of recurrent overdose				
03 Feb 2012	Problem: Telephone encounter (9N31.) H: spoke to Heather Pitt CPN - consulat psychiatrist - Dr RAjesh is doing her prescription until further notice. Therefore all rpt prescriptions discontinued for now D: Telephone encounter (9N31.)			
28 Nov 2012	spoke to boots in great bridge. melatonin should be mr tabs. have amended comp and boots will return 3wks scripts to have mr handwritten on.			
28 Nov 2012	SPOKE AGAIN WITH BOOTS. NEED IT TO BE PRESCRIBED AS CIRCADIN MR TABS.			
27 Oct 2016	Problem: Telephone encounter (9N31.) H: c/o vomiting symptoms since earlier hrs of this night, nausea first, can take sips fluids, but if takes more then vomits. no blood/haeantemesis, no abdo pains, no diarrrohea. No recent alcohol use. usually on lansoprazole for reflux. under stress as new job 3wks ago, she feels this has not helped. feels ok in self otherwise. she had called NHS 111 for advice and was advised fluids/hydration and speak to GP if required. P: we agreed script try buccastem, ensure regular sips fluids and keeps self hydrated. if not tolerating fluids, worse/abdo pains or haeamatemesis etc... to call back or for prompt review. she agrees with this

Confidential: Personal Data

Miss Marie Michelle Brown

608 276 5451, 18 Sep 1975

	does not wish to go back into Hallam street as feels nothing that can be done there that is not being done at Home. Good support network of Friends. Minimal alcohol intake. Smoker.. Is trying to avoid contact with Mum at present as she feels her mum is obsessing about putting her into hospital but Dad is visiting regularly. Due to see Judy Schmid today. Occasional suicidal thoughts. Had been on sertraline 100mg for only 4 days before medication was discontinued after overdose 6/7 ago. Took paracetamol x68 with alcohol and was discharged after blood tests. No eye jaundice or vomiting. Appears lucid and appropriate conversation. Does not feel can section or admit to hospital at present in light of this. Has mental capacity. Advised to restart sertraline 100mg OD as weekly script. Review in 1 week.
22 Jun 2010	Request from advocacy service Lesley Adams 6128681. Concerned re isolation non compliance re Rx etc has OPA with Dr Mistry 28/6. Visited patient at home. Orientated. Being evicted from flat for non payment of rent. Council pays the rent to private landlord. Housing officer visited with advocate 3/7 ago and is aware. Also problem with damaged lintel for which she is suing CMHT. They broke in when she was unwell. on probation but has DNA as smashed windows at Delta House PCMHT HQ when they failed to repair lintel. Low mood tearful. No IOSH. Reinforced to take Rx. Does not wish any involvement with CMHT. attends Simpson st mon and thurs DNA today. Dad visits every 2-3/52, mum every week.
03 Sep 2010	Tenancy support worker rang earlier in day to say she had visited Marie and she was drinking XS C2H5OH. Tab non compliance feeling dizzy. When I arrived no reply at home. Couldn't leave message on phone. Rang dad. Eventually traced support worker. Informed she was in hospital after ?OD. Updated by ACB on 06 Sep 2010.
26 Nov 2010	Heavy period today. Felt dizzy. Couldn't come to surgery. Asked for repeat pills few days ago but pill pack wasn't ready. Her main problem is psychological. Abdo NAD. Suggest increase NE 5tds now for 5/7 then NE 5 bd day 5 -26 needs repeat pill pack every 7/7. Updated by ACB on 29 Nov 2010.
28 Oct 2019	Problem: Home visit (XaBQf) H: Visited at home as did not stay in A & E on 24/10 as informs me she had panic attack and couldn't wait any longer. Reported missing by ?BCMHT to the police who broke into her flat. Eventually located at home but had taken OD IBF and PCM ? amount ? 2 packets of each. Did not reattend A & E for this but now under c/o Crisis team who are visiting this afternoon to supervise meds. Still pain in localised spot below L buttock no paraesthesia in leg or LBP but 2/12 noted what sounds like saddle anaesthesia and hesitancy. In last week aware of urge to defaecate but feeling of incomplete evacuation. D: ? Cauda equina syndrome (F246.) P: Advised needs urgent reattendance at A & E. Does not wish family to know in spite of my request. Agreed to inform her close friend Vi. Advised problem slipped disc affecting bladder nerves and MUST stay in to be assessed. Patient in full agreement and emotionally much improved today. Ambulance arranged and message left for Crisis team, informed A & E.

09 Dec 2019	Problem: Behavioural syndrome associated with physiological disturbance and physical factor (X00Sw) - Behavioural disorder - Updated by PH on 12 Oct 2009. Problem: Lumbar nerve root injury - L5 (SJ324) H: Review of medication. She was not given carbamazepine by the pharmacy but was given all her other meds. She therefore requests further carbamazepine. Also asks about dose increase. She was restarted back on carbamazepine as a mood stabiliser by crisis team after being off for about 1 month. Previously she had been stable on this since about Easter. She found the nerve root injection helpful. She is not sleeping well - waking early in the mornings. P: She will speak with pharmacist about the carbamazepine as we have issued this with the other meds. Start pregabalin as per neuro letter. She thinks the dose is 100mg bd which sounds reasonable. She will let us know if it is a different dose.
